**Missing screws in the blue pan can cause the clear plastic cover to become loose, releasing small balls which pose a choking hazard.**

**If you own this playset please remove it from the reach of children and use this online guide to determine if it is affected:**

1) Please locate the blue pan containing the encased colored balls.

2) Please turn the blue pan over and examine the underside. There should be six screws inserted through the bottom of blue pan into the clear plastic cover above.

4) If there are any screws **missing** from the underside of the blue pan, your product **is** affected by this recall. **Please remove the blue pan portion of the Learning Pots & Pans™ playset from the hands of children, immediately.**
