Registration

When you arrive at the Xtractaurs™ Landing Page, you must login or register before you can enter the Command Center. First click the “New Member” button. You will see a “Terms and Conditions” page. If you want to know more about what this page means, ask an adult to explain it to you. When you are ready, click the box that says “I accept these terms” and then click the NEXT button.

Now you’ll see a screen with some information to fill out. This includes your user name and password, and everything else you need before you can play online. Make sure you don’t use your real name! Once you have filled everything out on this screen, click the “Create My Account” button. After you’ve confirmed your login information, you can either extract DNA from one of your Xtractaurs™ figures or go straight to the Command Center.

Extracting DNA

To extract DNA from one of your Xtractaurs™, insert the Extraction Gun into your figure’s extraction location and pull the trigger. The screen will show your dino’s DNA being transferred to your computer and will reveal the Secret Attack you have extracted. Once extraction is complete, it will appear in the Hybrid Creator.

Free Trial

If you do not have an Xtractaurs™ Starter Kit, you will still have access to the site for 3 days,. Just register as normal and you can:

- Create and save up to five hybrids
- Send your hybrids into the Megavore Battles™
- Play all five Training Games in the Hybrid Compound
- Play the Tyrannosaurus Showdown™ Adventure Game

After three days, you will need to purchase a Starter Kit and connect an Extraction Gun to continue playing.

Playing with the Xtractaurs™ Starter Kit and Figures

Once you have Xtractaurs™ figures, you can do a lot more online! The more Xtractaurs™ you own, the more fun you can have! Each new dinosaur figure gives you:

- DNA to unlock new combinations in the Hybrid Creator
- A unique Secret Attack to use in the Megavore Battles™
- More dinosaurs to play with in the Training Games
- Bonus powers and abilities in the Adventure Games

The first time you extract DNA from a figure in a new clan, you gain a new Adventure Game! Collect all dinosaurs from that clan to unlock more powers and secrets in its Adventure Game.

Home Page

Every time you log in, you start at the Home Page, which gives you useful information such as:

- Your stats (including your current rank), how many Hybrids you've created, your total score and the number of battles you've won (to see your complete stats, click the link at the top of the screen that says [My Profile](#)).
- The top scores in the world in different categories:
 - Global Leader Board
 - Shows the Top 100 High Scores in all categories: Adventure Games, Training Games, and Megavore Battles™.
 - Adventure Games Leader Board
 - Shows only the best scores earned in the Adventure Games.
 - Training Games Leader Board
 - Shows only the best scores earned in the Training Games.
- Community news and updates, including where the Megavores™ are currently attacking!

To explore the different areas of the site, click on them at the top of the screen.

Whenever you want to come back to the Home Page, click the Xtractaurs™ logo in the upper left hand corner of the screen.

Command Center

From the Command Center you can get to all the other important places and activities on the site.

Click the door on the left to find out which Megavores™ are ready to battle and prepare to fight!

Click the Hybrid Creator panel in the middle of the Command Center to go to the [Hybrid Creator](#), where you can create hybrid dinosaurs with the DNA you have collected.

Click the door on the right to head into the Dino Compound, where you can see and interact with all your hybrids.

Click the Stats Button at the bottom of the screen to see the following information:

- Your rank in the worldwide scoreboards
- Your total score
- Your current title

Click the Games Button at the bottom of the screen to play one of the other Adventure Games you've unlocked.

Adventure Games

There are five different Adventure Games - one for each Xtractaurs™ clan.

The first time you extract DNA from a figure in a clan, you unlock that clan's Adventure Game. Once the game is unlocked, you can play it at any time.

Extracting DNA from other Xtractaurs™ in the same clan will give you extra abilities you can use in that clan's Adventure Game. These abilities enable you to play the game in exciting new ways, and may even help you score higher or gain more rewards!

In addition to points for playing the games, you can win Dino Cards and rare DNA. Dino Cards give you cool facts about each of the Xtractaurs™. Bonus DNA strands can be used to enhance your hybrids when you are creating them in the Hybrid Creator. There are four different DNA strands that you can collect in every Adventure Game. Once you use a bonus strand in a hybrid it is used up, so you will want to collect it again. There are also four Dino Cards to collect in each game. Unlock all the Adventure Games to enhance your collections!

Tyrannosaur Showdown™

Use the strengths of your Tyrannosaur clan to move through the different areas of the game, defeating enemies including vicious Megavore™ bosses! Each of the 5 Tyrannosaurs can defeat one of the bosses, and extracting DNA from different Tyrannosaurs will let you access different areas of the game and improve your skills. Choose your species wisely and eliminate all the Megavore™ bosses before taking on the greatest threat to the Tyrannosaurs -- the Mega Boss!

Ceratops Smash™

Deploy your Ceratopsid clan to smash everything in its way while looking for a kidnapped baby Triceratops! Extracting DNA from different Ceratopsids will give you extra bonuses that make smashing that much easier!

Stegosaur Shoot-Out™

These Stegosaur are prehistoric tanks – covered in armor and ready for battle! Turn them loose to destroy rocks, hot balls of lava and enemy dinos in your territory! Extracting DNA from different Stegosaur will give you bonuses to help you stay alive longer and shoot faster.

Raptor Rush™

For a raptor, mealtime is exercise time! Help your hungry dinosaur run down a tasty Lesothosaurus while avoiding dangers and obstacles. As you collect DNA from more species of the Raptor clan, your racing Raptor becomes faster and gains bonus protection!

Flight of the Pterosaur™

Gather up the scattered baby Pterodactyls while avoiding the sharp teeth of a fearsome Rhamphorhynchus! Collecting DNA from different Pterosaur species will give you more lives, faster flying speed and better armor.

See each game for additional instructions.

Hybrid Creator

Simply put, the Hybrid Creator is where you create hybrids. Every time you extract or earn new DNA, it is stored in the gene pool, which is on the left side of the screen. You can build up your DNA supply by extracting it from new Xtractaurs™, earning it in Adventure Games or looting it from defeated Megavores™.

Click the “?” in the lower right corner of the Hybrid Creator for instructions on how to create a hybrid.

Once you have created and saved your hybrid, you can click the “Compound” button to view it in the Dino Compound, or the “Megavore Battles™” button to send it straight into battle!

Dino Compound

The Compound is where all the Xtractaurs™ you’ve collected and hybrids you’ve created live.

When you first enter the Dino Compound, you are shown a map of the different sectors. Each sector houses one Xtractaur™ clan and any hybrids created using dinosaurs from that clan. Click the sector you would like to visit.

Once you’re in a sector, you can view your hybrids by clicking the left and right arrows on either side of the viewing windows. You will see three hybrids at a time. When you are visiting a clan, you can earn health boosts for that clan by playing the Training Games.

Click a dinosaur to select it. Whenever a dinosaur is highlighted, its stats will appear in the Compound Console at the bottom of the screen.

From the Compound Console, you can send your selected dinosaur to several different places:

- [Showcase](#): Show off your hybrid to other players.
- Hybrid Creator: Make changes to your hybrid.
- Megavore Battles™: Send your hybrid straight into battle.
- Training Games: Play to earn health boosts to use in the Megavore Battles™.

Training Games

There are five games in the Dino Compound. Click the button for the game you want to play on the Compound Console at the bottom of the screen. You can earn health boosts by playing any of the games – use these to heal while battling the Megavores™. Health boosts belong to the clan that won them – hybrids can only use them in battles that were won by hybrids within the same base clan.

Speed Feed

It's never a good idea to walk into the lair of hungry dinosaurs, even to feed them! Use your special feeding slingshot to keep your distance and shoot food packets into their pens so they can have their lunch.

Dining Downpour

Exercise your dinosaur in this high-tech supercharged simulation! Help your dinosaur avoid falling debris while catching tasty snacks!

Dinocode Link

Use your brain with this fast-paced puzzle game! Click to connect chains of matching capsules to remove them from the board and collect puzzle pieces. The longer the chain, the more points you earn!

Dino Dodgeball

Protect members of your clan by blocking and deflecting rocks thrown by an attacking dinosaur pack. Try to knock the attacking dinosaurs out with their own rocks!

Med Pack Attack

After a hard day of fighting Megavores™, your dinosaurs need some medical attention. Still, it's a good idea to keep your distance. Shoot the correct medical packs at your patients and have them feeling better again in no time!

Megavore Battles™

The Megavores™ are causing destruction all over the world. It's up to you and your hybrids to stop them!

When you enter the Megavore Battles™ area, you will see the Battle Map. On the map are flashing icons where Megavores™ have been spotted. Click one of the dots to see which Megavore™ is attacking. If you want to fight that Megavore™, click the Battle button. Otherwise, click the X in the corner of the Megavore™ info box to go back to the Battle Map.

Once you click the Battle button, you will see the Megavore™ you are facing off against and will have a chance to select the hybrid you want to send into battle. Use the drop down box to select a clan, then click the arrow buttons to scroll through your hybrids. Once you've found the hybrid you want to use, click the Battle button and get ready to fight!

Battle Basics

You fight Megavores™ by commanding your hybrid to attack when it's your turn. Keep an eye on the stopwatch timer. When it turns green it's your turn to attack! You can click one of the basic attacks (Bite, Claw, Bash, Tail) or one of your Secret Attacks to have your hybrid take action. If you have any Health Boosts, you can click on them to increase your hybrid's health during battle.

The basic attacks are Bite, Claw, Bash and Tail. To use each attack, your hybrid must have the right body parts: a predator's teeth for Bite, clawed legs for Claw, horns for Bash and a spiked or heavy tail for Tail. Use these whenever it's your turn to damage the enemy Megavore™. The most effective attack will depend on your hybrid's stats and your enemy's weaknesses.

Using Secret Attacks

Secret Attacks are added to your hybrid during the creation process, based on the types and amount of DNA you add to it. Secret Attacks come in two types: Active and Passive. An Active attack is an ability you use to do a special move in combat. A Passive attack is an attack that just works all the time; you don't have to do anything to activate it.

When you click one of the Secret Attack icons, you play a mini-game. How well you do in the mini-game determines how well your Secret Attack works against the Megavore™ in battle.

Mini-Games:

Click

Press the spacebar as many times as you can before the time runs out.

Single Timing

The pointer moves around in a circle. When it is pointing at the yellow line, click (or press the spacebar). The closer to the middle of the line you are, the better your attack will work.

Multi Timing

Same as Single Timing, but there is more than one line to hit. Hit them all for best results.

Moving Timing

Same as Multiple Timing but the lines move around the circle, not just the pointer. This is the hardest version of this game!

Accuracy

Click all the targets that appear before time runs out.

Shooting Gallery

Hit the targets as they appear. Try to hit the middle for a bull's eye and extra points!

Moving Gallery

Same as Shooting Gallery but all the targets move around, making them harder to hit!

Cool-down

Each Secret Attack has a cooldown time. The cooldown time is how long you have to wait until you can use the attack again. After you use an attack, you will see the icon change to show the cooldown timer. When the cooldown timer disappears, you can use the attack again on your next turn. Secret Attacks have short, medium or long cooldowns.

Secret Attack Descriptions

Below is a list of all the Secret Attacks you can unlock along with how long their cooldown is, whether they are active or passive, and if active, which mini-game they use and how hard the mini-game is.

Chomp

Long Cooldown, Active (Click Mini-Game)

Your dinosaur receives extra healing after using a bite attack.

Stomp

Medium Cooldown, Active (Multi-Timing Mini-Game)

Ground pound stun to any non-flying enemy.

Rend

Short Cooldown, Active (Click Mini-Game)

Super fierce bite that causes extra damage.

Roar

Medium Cooldown, Active (Click Mini-Game)

Stuns the enemy.

Counterattack

Immediate claw attack launched when enemy dodges an attack.

Frenzy

Long Cooldown, Active (Shooting Gallery Mini-Game)
Hybrid does multiple claw strikes to the enemy.

Slice

Long Cooldown, Active (Multi-Timing Mini-Game)
Non-healing claw strike to the enemy.

Acid Spit

Short Cooldown, Active (Multi-Timing Mini-Game)
Damage that reduces enemy's armor.

Jump

Medium Cooldown, Active (Multi-Timing Mini-Game)
Hybrid attacks the enemy with both claws and feet.

Soar

Short Cooldown, Active (Multi-Timing Mini-Game)
Surprise attack from above.

Flap

Long Cooldown, Active (Click Mini-Game)
The hybrid stuns the enemy with its wings.

Bomb

Medium Cooldown, Active (Shooting Gallery Mini-Game)
Your hybrid drops a boulder onto the enemy.

Swoop

Medium Cooldown, Active (Click Mini-Game)
The enemy is attacked with a flying charge.

Spin

Long Cooldown, Active (Multi-Timing Mini-Game)
Causes multiple tail strikes to the enemy.

Backfire

Long Cooldown, Active (Click Mini-Game)
Enemy receives damage the next time they attack.

Cover

Long Cooldown, Active (Click Mini-Game)
Doubles the armor value of the hybrid.

Spike

Medium Cooldown, Active (Moving Shooting Gallery Mini-Game)
Tail spikes cause double damage to the enemy.

Charge

Long Cool-down, Active (Click Mini-Game)
Hybrid gets an automatic first attack, and a double-strength charge attack to use during battle.

Defend

Medium Cool-down, Active (Multi-Timing Mini-Game)
Horn damage dealt to enemy after it attacks.

Mesmerize

Long Cooldown, Active (Multi-Timing Mini-Game)
Hybrid gets an automatic first attack and stuns the enemy.

Impale

Medium Cooldown
Fierce horn attack which causes extra damage for a short time.

Regenerate

Passive
Hybrid receives a health boost periodically.

Diseased Claws

Passive
Hybrid's claws do extra claw damage to the enemy.

Poisonous Drool

Passive
The hybrid does extra bite damage to the enemy.

Surge

Long Cooldown, Active (Click Mini-Game)
The hybrid moves in powerful speed bursts.

Berserk

Passive
All attacks do extra damage to the enemy.

Immune Booster

Long Cooldown, Active (Multi-Timing Mini-Game)
Instant healing.

Second Wind

Long Cooldown, Active (Click Mini-Game)
A single health boost.

Ambush

Passive
An automatic first strike using the hybrid's strongest attack.

Tail Swipe

Long Cooldown.
Stuns the enemy and reduces enemy's agility.

Fleet Footed

Passive
Increases the hybrid's speed.

Armored Skin

Passive
Increases the hybrid's armor.

Strong Heart

Passive
Increases the hybrid's health.

Mutated Muscles

Passive
Increases the hybrid's strength.

Agile

Passive

Increases the hybrid's agility.

Wing Glider

Passive

Increases the hybrid's wing speed.

Honed Horns

Passive

Increases the hybrid's horn attack.

Barbaric Bite

Passive

Increases the hybrid's bite attack.

Tremor Tail

Passive

Increases the hybrid's tail attack.

Cleaving Claws

Passive

Increases the hybrid's claw attack

Using Health Boosts

You can win Health Boosts for each of your clans by playing [Training Games](#). Use the Health Boosts in battle to restore some of your hybrid's health, letting you stay in the fight longer.

To use a Health Boost, click the Health Boost icon when it is your turn. The number on the icon will go down, showing you how many Health Boosts you have left. When you've used all your Health Boosts, the icon will disappear.

Any Health Boosts you use in a fight will be used up forever, but any you don't use will carry over for other members of the same clan to use in the next fight. Be sure to use them wisely!

Victory! (Or Not)

When you defeat a Megavore™ in battle, you will be shown a Victory message that lets you know whether you were able to loot any Megavore™ DNA. If you were able to loot DNA from the Megavore™, this DNA will now be available for one-time use in the Hybrid Creator.

If you lose, don't worry. You can always fight the Megavore™ again. Pay attention to the tips you get after the battle. They may give you a clue about a better way to fight this particular Megavore™.

Whether you win or lose, you will get the option to fight this Megavore™ again or return to the Battle Map and find a new enemy!

Practice

If you aren't quite ready to take the plunge into fighting real Megavores™, you can try practicing your skills. Click the "Practice" Button on the Battle Map console and your hybrid will be taken straight to the Holographic Battle Simulator.

In the Simulator your hybrid can fight holographic Megavores™ for practice.

Training battles are identical in every way to normal Megavore™ battles except that:

- You gain less experience points (XP) for defeating holographic Megavores™.
- You are not able to loot DNA from the holographic Megavores™.
- Your practice battles are not tracked in your Win/Loss record like your real battles.

Showcase

Go to the Showcase to show off your hybrids and check out hybrids that other players have made. You can search for hybrids of specific base species and sort by when the hybrid was created, types of stats, rating, or by alphabet. You can also search by username. Use the scroll bar to see more hybrids.

You can select any of the hybrids in the hybrid selection area to view their stats, rating, and which Megavores™ they've defeated. You can also rate how cool you think they are by clicking on the thumbs-up symbols and giving them one to five thumbs ups!

Ratings:

- 1 Thumbs Up: DNA Disaster
- 2 Thumbs Up: Try another re-mix
- 3 Thumbs Up: Pretty cool
- 4 Thumbs Up: Wow, what's your recipe?
- 5 Thumbs Up: Awesomous Maximus!

If you want one of your hybrids to show up in the Showcase, click the "Showcase" button in the Dino [Compound](#) or the Hybrid [Creator](#).

Profile Page

Click "My Profile" to see a log of everything you've been up to with your Xtractaurs™!

About Xtractaurs™

The About Xtractaurs™ page explains the story behind Xtractaurs™ and how to play.

Product Gallery

The Product Gallery page includes information about the Xtractaurs™ Starter Kit and details on each of the different Xtractaurs™ you can collect.

Info for Parents

The Info for Parents page helps parents understand what Xtractaurs™ is all about! If your parents have questions about how Xtractaurs™ works, show them this link.

Store Locator

The Store Locator allows you to find stores that carry and sell Xtractaurs™.

Contact Us

The Xtractaurs™ Contact Us link will give you information on how to contact Customer Service.

Tips/Hints/Strategies:

Bonus DNA

You can earn bonus DNA in the Adventure Games or loot them from a Megavore™ after defeating him. The bonus DNA will help you create more awesome hybrids!

Dino Cards

The more you know about your dinosaurs, the better you will be able to make a strong and fearsome hybrid! Play the Adventure Games to collect Dino Cards and gain valuable information on each dinosaur species. You can view the cards you've collected by clicking the "My Profile" link at the top of any page.

Practice

If you're having trouble beating the Megavores™, try practicing with your hybrids before taking them into real battles. Access the Practice area through the Megavore Battles™™ page. You can gain a little XP this way and also test how well your hybrids might perform in the field.

Mix up the Hybrids

Make sure to create hybrids with different secret attacks. The more hybrids you have, the easier it will be to find one that can beat different types of Megavores™!

Fight Another Day

Creating hybrids is fun, but don't forget to also build up your hybrids with experience points (XP). That's the only way you're going to be able to beat some of the toughest Megavores™! If a certain Megavore™ is stomping on your dinos, try to gain XP by fighting some that aren't as brutal until you're ready to move on to tougher foes.

Game Play FAQ

I can't see the Adventure Games. Where did they go?

You can get to the Adventure Games by clicking on the Games button on the console in the Command Center.

Where can I see my Player Stats?

You can see your Player Stats in the Command Center and on your Profile Page. In the Command Center, click on the Stats button on the console. When you go to your Profile Page, your Player Stats will be displayed.

I was powering up my Secret Attack in battle, and instead of the Megavore™ getting attacked, my hybrid got attacked. Why did that happen?

If you don't keep up with the mini-game, then the attack can backfire. Do the best you can to get the best results for your Secret Attack. If you are having trouble with a particular mini-game, you can either work on your skills in Practice or else try to use abilities that use a different type of mini-game.

Where can I find the Dino Cards that I collected in the Adventure Games?

You can see your Dino Cards on your Profile Page. Be sure to collect them all!

What is bonus DNA?

Bonus DNA is rare DNA that you earn by playing Adventure Games. You can also get Bonus DNA from the Megavores™ when you defeat them in battle. Use your bonus DNA to create even more powerful hybrids!

Where can I see my hybrids after I make them?

You can see your hybrids in the Dino Compound.

How many hybrids can I make?

You can make thousands, but the Compound gets crowded and you can only keep 50 at a time. So sometimes you will need to let some hybrids go in order to make room for new ones. To release a hybrid, go to the compound and press the "Release Hybrid" button. A message will come up asking you to confirm that you are ready to let that hybrid go; once you choose "Yes," the hybrid will be gone for good.

You can also release a hybrid if you try to save one when you've reached the maximum capacity of your Dino Compound. A message will come up in the Hybrid Creator letting you know your Dino Compound is full and you'll have to release a hybrid to save a new one – from here you can either release a hybrid and save the new one, or choose not to save the new hybrid you just created.

Can I ever change my hybrids?

Yes! You just need to go to the Dino Compound from the Command Center. Once you are in the Dino Compound, you'll see a console at the bottom of the screen. Select the hybrid you want to change, then click on the "Creator" button and it will take you to the Hybrid Creator so you can change your hybrid.

How do I get DNA?

A) You can get DNA by extracting it from your Xtractaurs™ figures. You can win rare Bonus DNA by playing the Adventure Games from the Command Center, or by beating a Megavore™ in battle and looting it from him.

Want to play on more than one computer?

You can log on to <http://www.xtractaurs.com/> on any computer, but you can only extract DNA after you have set up your Extraction Gun. It means doing it more than once, but then you can extract DNA and create tons of hybrids on every computer you use. To set up the Extraction Gun on another computer, [click here](#).

Why am I seeing an error that says “The application failed to initialize properly (0xc0000135) Click on OK to terminate the application”?

Make sure you have Microsoft® .NET 2.0 Framework installed if you are using Microsoft XP.

Minimum System Requirements

All

- USB 2.0
- CD-ROM drive
- Flash Player 9
- Broadband internet connection
- 1024x768 display capability (video card + monitor)

PC

- Windows XP/Vista OS
- P4 – 2 GHz processor
- 512 MB of RAM (1 GB or higher for Vista)
- Internet Explorer 7 or Firefox 3

MAC

- OS 10.5 (Leopard) or higher preferred
- Intel Mac P4 2 GHz processor or Power PC equivalent
- 512 MB of RAM
- Safari 3.1.2 or Firefox 3
