2. TO PLAY:

Turn power switch on.

Insert bottle or baby's right thumb all the way into mouth at an upward angle in such a way that tip of object makes contact with "roof" of doll's mouth. This will activate sucking motion.

"Feed" your doll with her bottle, and watch as the "milk disappears."

Lay your doll down or rock her gently forth and back. She'll drift off to sleep!

Place your doll upright to wake her.

Doll will make random motions and sounds without any physical interaction for approximately 6 minutes. After this, it will go into mechanical sleep mode. Any physical movement of the doll or "feeding" the doll will bring it out of sleep mode.

When play is finished, it is important that you turn off power switch while doll's eyes are still open.

3. SKIN CARE HINTS:

- If skin is dirty, clean with warm (85-100° F / 29°-37° C) water and dish washing detergent or with household alcohol.
- After cleaning, allow to dry at least 2-5 minutes before use.
- Talc can be applied to smooth the surface. (Use only a very small portion.)

- Longtime exposure to direct sunlight.
- Apply excessive water to skin.
- Apply any type of ink.
- Apply nail polish.
- Clean with ammonia or any ammonia based detergents.
- Expose to high heat.
