

74522

**For use with a Power Wheels® vehicle with A-Style connector.
This product is not intended for children; it is for adult use only.
This battery is not a toy.**

**Please read this booklet before first-time use. Keep these instructions
for future reference, as they contain important information.**

6-volt Rechargeable Replacement Battery

ELECTRICAL HAZARD

WARNING

- **PREVENT FIRE**

- Never modify the electrical system. Alterations could cause a fire resulting in serious injury and could also ruin the electrical system.
 - Use of the wrong type battery or charger could cause a fire or explosion resulting in serious injury.
 - Use of Power Wheels® components in products other than Power Wheels® vehicles could cause overheating, fire or explosion.
- The battery must be handled by adults only. The battery is heavy and contains sulfuric acid (electrolyte). Dropping the battery could result in serious injury.
 - Never allow children to charge the battery. Battery charging must be done by adults only. A child could be injured by the electricity involved in charging the battery.

ELECTRICAL HAZARD

WARNING

- Never lift or carry the battery by the wires or connector. This can damage the battery and possibly cause a fire resulting in serious injury. Lift and carry the battery by the case only.
- Read the safety instructions on the battery.
- Examine the battery, charger and their connectors for excessive wear or damage each time you charge the battery. If damage or excessive wear is detected, do not use the charger or the battery until you have replaced the worn or damaged part.

CAUTION

Use the charger in dry locations only.

GETTING STARTED

Your new Power Wheels® 6 volt battery has a built-in, self resetting thermal fuse and an **A-style connector**. The A-style connector on this battery is **NOT** immediately compatible with a vehicle that has a motor harness with either an H-Style or Blue Cover connector. Please identify the type of motor harness connector you have on your vehicle by reviewing the diagrams below.

If your vehicle has a connector that looks like the one pictured above, this battery is compatible for use in your vehicle.

If your vehicle has a connector that looks like either one pictured above, this battery is **NOT** immediately compatible for use in your vehicle. Please call our toll-free service lines at **1-800-348-0751** or visit us on-line at **www.service.fisher-price.com** for a **FREE Connector Converter**.

IMPORTANT INFORMATION

- You must charge your battery for 18 - 30 hours before use in your vehicle for the first time.
- The battery must be upright while charging.
- Do not short circuit the battery.
- You do not need to remove the battery from your vehicle to recharge it.
- Before charging the battery, examine the battery case for cracks and other damage which may cause sulfuric acid (electrolyte) to leak during the charging process. If damage is detected, do not charge the battery or use it in your vehicle. Battery acid is very corrosive and can cause severe damage to surfaces it contacts.
- Do not charge the battery on a surface (such as kitchen countertops) which could be damaged by the acid contained inside the battery. Take precautions to protect the surface on which you charge your battery.
- Use only a Power Wheels® Super 6 volt charger with an A-style connector (120 VAC, 60 Hz, 15W with an output of 6 VDC, 1200mA, 7.2W) to charge your Power Wheels® 6 volt battery.
- The charger is not a toy.
- **Adults Note:** Regularly examine the charger for damage to the cord, plug, housing or other parts that may result in the risk of fire, electric shock or injury. In the event of any damage, do not use the charger until the damage has been properly repaired. Please call 1-800-348-0751.
- If you have any questions about your Power Wheels® battery, please call our toll-free service lines at **1-800-348-0751** from 9 AM to 7 PM (EST) Monday through Friday and 11 AM to 5 PM Saturday. Trained customer service representatives are available to take your call in English or French. Or, visit us on-line at **www.service.fisher-price.com**.

ABOUT THERMAL FUSES

About Thermal Fuses

Your Power Wheels® 6 volt battery is equipped with a built-in thermal fuse. The thermal fuse is a self-resetting safety device which automatically “trips” and shuts down operation of the vehicle if the vehicle is overloaded or the driving conditions too severe. Once a fuse has “tripped”, remove your foot from the pedal or hand from the button and wait approximately 25 seconds before operating the vehicle again. To avoid repeated automatic shut-downs, do not overload the vehicle by exceeding the maximum weight capacity (as listed in your vehicle’s Owner’s Manual) or by towing anything behind the vehicle. Avoid severe driving conditions, such as driving up slopes or running into fixed objects, which can cause the wheels to stop spinning while power is still being supplied to the motors and make sure your child stops the vehicle before switching speeds or direction. If a thermal fuse in a battery continually trips under normal driving conditions, please contact your local Power Wheels® Authorized Service Center. For the location of the Authorized Service Center nearest to you, visit us on-line at www.powerwheels.com, or call **1-800-348-0751**.

CHARGING THE BATTERY

- Plug the charger and battery connectors together. Push firmly to make sure the two connectors are completely joined.

CHARGING THE BATTERY

- Plug the charger into a standard wall outlet. If your charger has an LED, the LED lights. The LED on the charger does not indicate the charge status of your battery. The LED allows you to see that there is power from the wall outlet to the charger.

Notes: If power flow to the wall outlet is controlled by a switch, make sure the switch is “ON”. Use the charger only in a wall outlet. Do not plug the charger into a ceiling outlet.

- Before first time use, charge the battery for **at least 18 hours**.
- Recharge the battery for at least 14 hours after each use of your vehicle.
- Never charge the battery longer than 30 hours.
- Once the battery is charged, disconnect the charger connector from the battery connector. Unplug the charger from the wall outlet. The battery is now charged and is ready to be installed in your vehicle. Please see “Battery Installation” in your vehicle’s Owner’s Manual.

BATTERY CARE

If a battery leak develops, avoid contact with the leaking acid and place the damaged battery in a plastic bag. See information below for proper disposal.

If acid comes in contact with skin or eyes, flush with cool water for at least 15 minutes and call a physician.

If acid is internally ingested, give water, milk of magnesia or egg whites immediately. Never give emetics or induce vomiting. Call a physician.

- **Charge a new battery for at least 18 hours before using in your vehicle.** Never charge the battery longer than 30 hours. Overcharging or undercharging the battery may shorten battery life and decrease vehicle running time.
- Charge the battery after each use, regardless of how long the vehicle was used.
- Do not allow the battery to run down completely before charging.
- Charge the battery before storing the vehicle.
- Charge the battery at least once per month, even if the vehicle has not been used.
- Leaving the battery in a discharged condition will ruin it.
- Always remove an exhausted battery from the vehicle. Battery leakage and corrosion can damage the vehicle.
- Do not store the battery on a surface (such as a kitchen counter top) which could be damaged by the acid contained inside the battery. Take precautions to protect the surface on which you store the battery.
- Do not store the battery in temperatures above 75° F or below -10° F.

BATTERY DISPOSAL

- Your Power Wheels® battery is a non-spillable sealed lead-acid battery. It must be recycled or disposed of in an environmentally sound manner.
- Do not dispose of a lead-acid battery in a fire. The battery may explode or leak.
- Do not dispose of a lead-acid battery in your regular, household trash. The incineration, landfilling or mixing of sealed lead-acid batteries with household trash is prohibited by law in most areas.
- Protect the environment by not disposing of this product with household waste (2002/96/EC). Check your local authority for recycling advice and facilities (Europe only).
- Return an exhausted battery to a federal or state approved lead-acid battery recycler, such as a Power Wheels® authorized service center or a local seller of automotive batteries. For the authorized service center location nearest to you, please visit us on-line at www.powerwheels.com or call 1-800-348-0751. Contact your local waste management officials for other information regarding the environmentally sound collection, recycling and disposal of lead-acid batteries. If you live in the State of Florida or the State of Minnesota, it is prohibited by law for anyone to throw away lead-acid batteries in the municipal waste stream.

LIMITED WARRANTY

Statement of Limited Warranty

This 6 month limited warranty covers the Power Wheels® 6 volt battery purchased from Power Wheels® by the original purchaser, against defects in materials and workmanship.

This warranty covers normal use and does not cover the Power Wheels® battery if damaged by unreasonable use, neglect, accident, abuse, misuse, improper service or other causes not arising out of defects in materials or workmanship. Evidence of any attempt at consumer repair will void this warranty. THIS WARRANTY DOES NOT COVER, AND IS INTENDED TO EXCLUDE, ANY LIABILITY ON THE PART OF POWER WHEELS®, WHETHER UNDER THIS WARRANTY OR IMPLIED BY LAW FOR ANY INDIRECT OR CONSEQUENTIAL DAMAGES FOR BREACH OF WARRANTY. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION SO THIS LIMITATION MAY NOT APPLY TO YOU. This warranty gives you specific legal rights, and you may also have other rights which may vary from state to state. PLEASE SAVE YOUR ORIGINAL SALES RECEIPT.
