# IMPORTANT! Calibrate the stylus to the screen!

Pixter® will not function properly until you align the stylus and screen image.

- Install four "AA" **alkaline** batteries. Turn Pixter power on. Wait until you see the Home Screen.

- Turn Pixter over and locate calibration hole. Insert, push and hold stylus in calibration hole. Turn Pixter upright.

- When you see two $\oplus$, remove stylus from calibration hole.

- First touch upper left corner $\oplus$ with tip of stylus.

- Then, touch lower right corner $\oplus$ with tip of stylus.

Now, refer to the enclosed Owner's Manual for important information and tips!
