PERFORMANCE TIPS

Q. My vehicle keeps crashing on the track for no reason. What is the problem?

A. Clear all obstructions on the track. Adjust track side walls at each connection point and make sure they are assembled either inside or outside of the track tabs, as described in the assembly steps.

Q. My vehicle keeps slowing down by itself on the track. What is the problem?

A. Lint may collect around your vehicle's axles. This may cause the vehicle to run slowly. Use tweezers or a toothpick to remove lint.

Q. My vehicle cannot get through the shark after being chomped. What is the problem?

A. Open the shark's mouth and make sure to move the flaps inward.
