OR

**GFY47**  
**PIRANHA PLANT SLIDE TRACK SET\***

Refer to each expansion track set instructions for assembly details and play features.  
Additional tracks and sets sold separately, subject to availability. Colors and decorations may vary.

**Q.** Why does my kart keep crashing into the track side walls?

**A.** Some of the track pieces are not properly assembled. Clear all obstructions on the track and adjust track side walls at each connection point to ensure each piece is firmly attached.

**Q.** What can I do to speed up my kart for the curves during the race?

**A.** Time it right when your kart passes through the launching tunnel and adjust your slamming power to speed up your kart.

**Q.** Why is my kart having trouble getting past the tower?

**A.** The inner long curve track may be obstructed when it is attached incorrectly to the tower. Adjust the curve track to ensure it is attached to the tower in the correct position.
