

Let's Play!

Land Harold on the rescue basket and lift it to the top.

Load the tiger cub with handle up.

Slide the switch on back of Thomas to turn power on.

As Thomas stops, flip the lever to release the engine and the tiger cub drops into the cargo car.

The steep track falls automatically, making a bridge for Thomas to cross into the rescue basket.

As Thomas enters the rescue basket, press the red button to see Harold "fly" the cub to safety.

Reset the rescue basket and load the tiger cub for the next round.

You can also hang the tiger cub on Harold's hook to "fly" them around.

Helpful Hints

Look for codes on the bottom of each track.

Assembly steps marked with a star indicate a permanent assembly. Once these parts are assembled, they can't be taken apart.

Some engines may not work on this track set.

Battery Information

REQUIRES:
• Phillips screwdriver (not included) for battery installation.
• Two AAA (LR03) **alkaline** batteries (not included).

BATTERY INSTALLATION

Access the battery compartment by loosening the screw in the bottom of the engine and separating the top half of the engine from the bottom half of the engine. Install the batteries as indicated inside the battery compartment. Re-assemble the halves of the engine and tighten the screw. If the engine begins to malfunction, first check battery installation. You may need to reset the electronics by removing the batteries and reinstalling them. If the engine continues to malfunction or no longer operates, it's time to replace the batteries with fresh batteries. For longer life, use **alkaline** batteries.

BATTERY SAFETY INFORMATION

In exceptional circumstances batteries may leak fluids that can cause a chemical burn injury or ruin your product. To avoid battery leakage:
• Non-rechargeable batteries are not to be recharged.
• Rechargeable batteries are to be removed from the product before being charged.
• Rechargeable batteries are only to be charged under adult supervision.
• Do not mix alkaline, standard (carbon-zinc), or rechargeable batteries.
• Do not mix old and new batteries.
• Only batteries of the same or equivalent type as recommended are to be used.
• Batteries are to be inserted with the correct polarity (+ and -).
• Exhausted batteries are to be removed from the product.
• The supply terminals are not to be short-circuited.
• Dispose of batteries safely.
• Do not dispose of this product in a fire. The batteries inside may explode or leak.

1.5V
