Battery Installation

Airplane

- Locate the battery compartment on the back of the airplane.
- Loosen the screw in the battery compartment door with a Phillips screwdriver. Lower the battery compartment door and insert three "AAA" (LR03) **alkaline** batteries.
- Close the battery compartment door and tighten the screw with a Phillips screwdriver. Do not over-tighten.

IMPORTANT! Under normal use conditions, the batteries in the airplane will require replacement more often than the batteries in the remote controller.

Remote Controller

- Locate the battery compartment on the bottom of the remote controller.
- Loosen the screw in the battery compartment door with a Phillips screwdriver. Remove the battery compartment door and insert three "AAA" (LR03) **alkaline** batteries.
- Replace the battery compartment door and tighten the screw with a Phillips screwdriver. Do not over-tighten.

Vehicle

- Locate the battery compartment on the bottom of the vehicle.
- Loosen the screw in the battery compartment door with a Phillips screwdriver. Remove the battery compartment door and insert one "AAA" (LR03) **alkaline** battery.
- Replace the battery compartment door and tighten the screw with a Phillips screwdriver. Do not over-tighten.

We recommend the use of **alkaline** batteries for longer battery life.

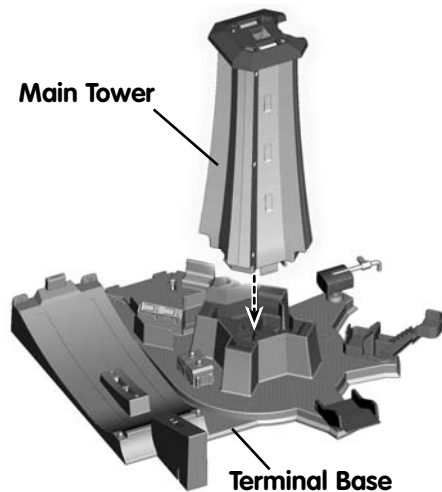

In exceptional circumstances, batteries may leak fluids that can cause a chemical burn injury or ruin your product. To avoid battery leakage:

- Do not mix old and new batteries or batteries of different types: alkaline, standard (carbon-zinc) or rechargeable (nickel-cadmium).
- Insert batteries as indicated inside the battery compartment.
- Remove batteries during long periods of non-use. Always remove exhausted batteries from the product. Dispose of batteries safely.
- Do not dispose of this product in a fire. The batteries inside may explode or leak.
- Never short-circuit the battery terminals.
- Use only batteries of the same or equivalent type as recommended.
- Do not charge non-rechargeable batteries.
- Remove rechargeable batteries from the product before charging.
- If removable, rechargeable batteries are used, they are only to be charged under adult supervision.

Protect the environment by not disposing of this product with household waste (2002/96/EC). Check your local authority for recycling advice and facilities (Europe only).

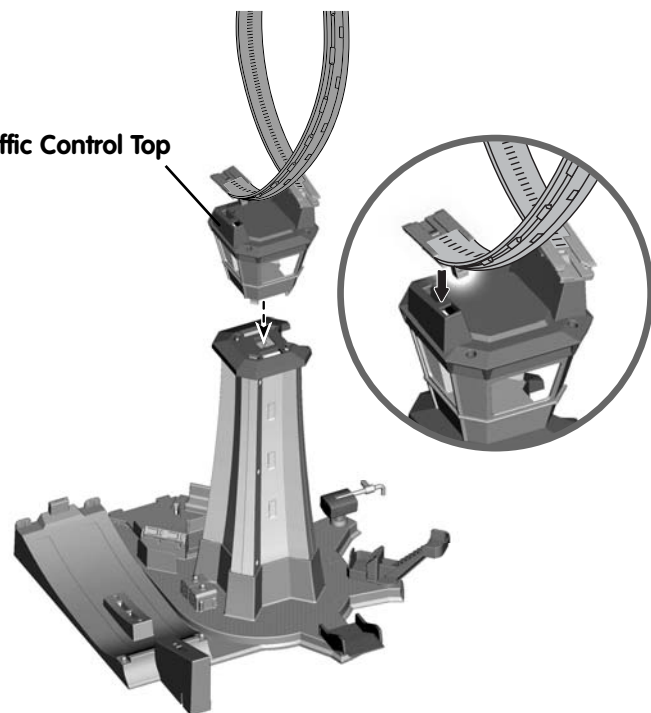

Assembly

1

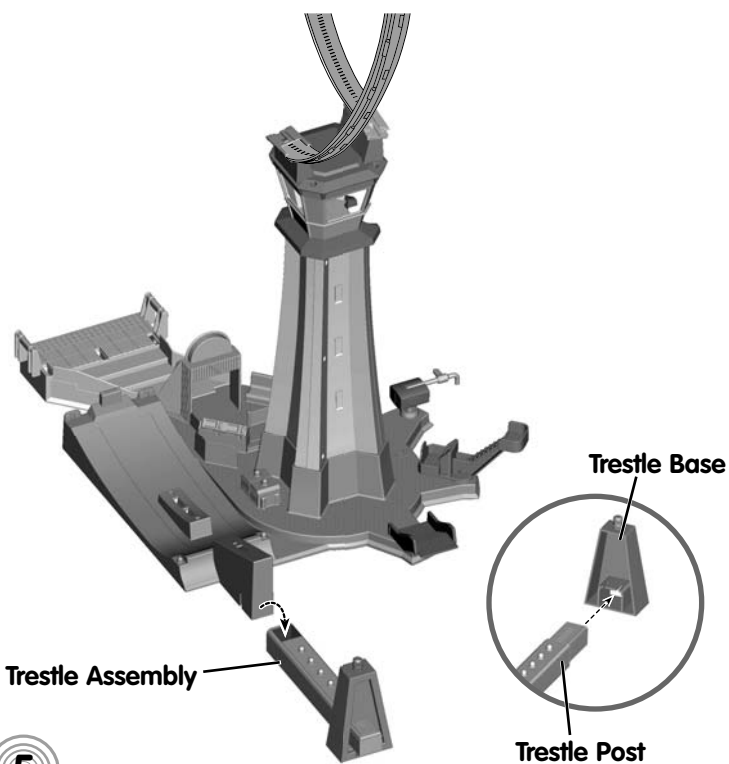

- “Snap” the main tower into the terminal base.

Traffic Control Top

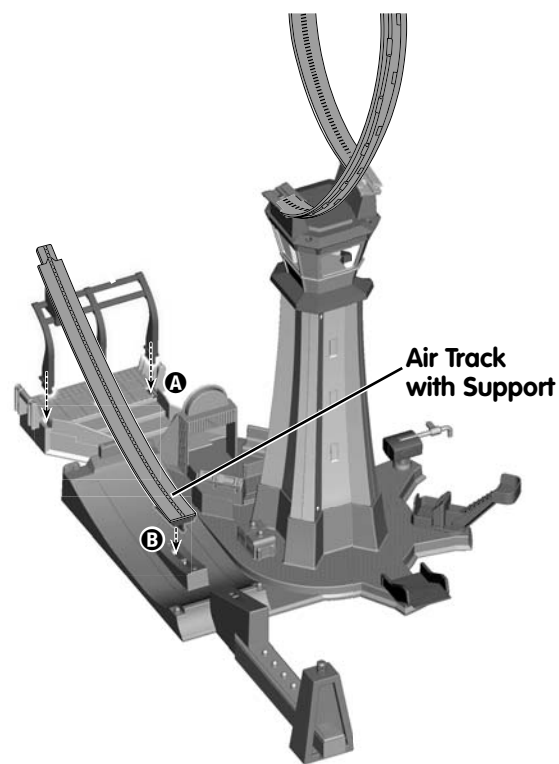

2

- “Snap” the traffic control top into the main tower.
- “Snap” the free end of the air track into the slots in the top of the control tower

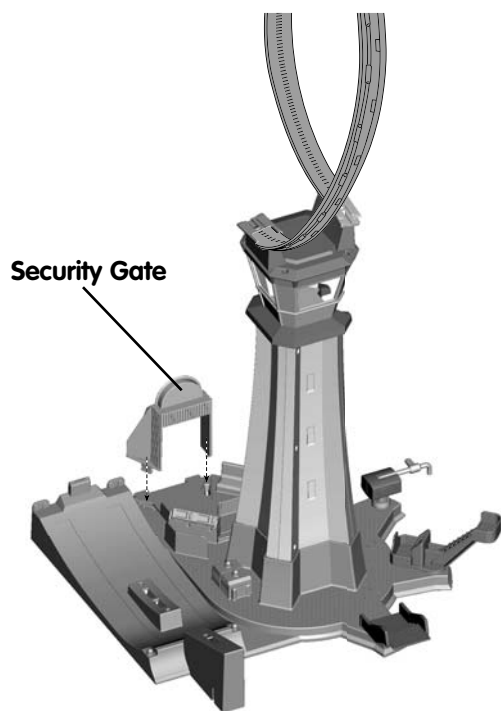

5

- Connect the trestle base to the trestle post.
- Lift the terminal base and lower to “snap” onto the trestle assembly, as shown.

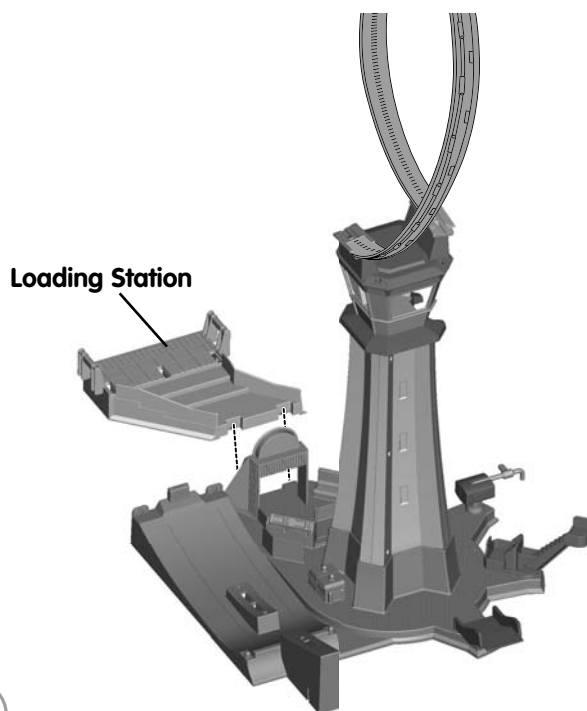

6

- Position the air track with support above the terminal base assembly.
- First, “snap” the ends of the support into the slots in the loading station A.
- Then, fit the tabs on the track into the slots in the terminal base B.

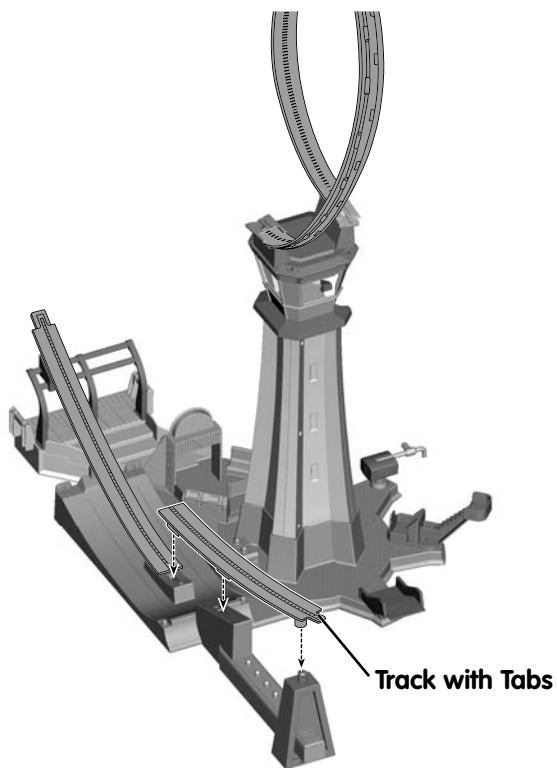

3

- “Snap” the security gate into the slots in the terminal base.

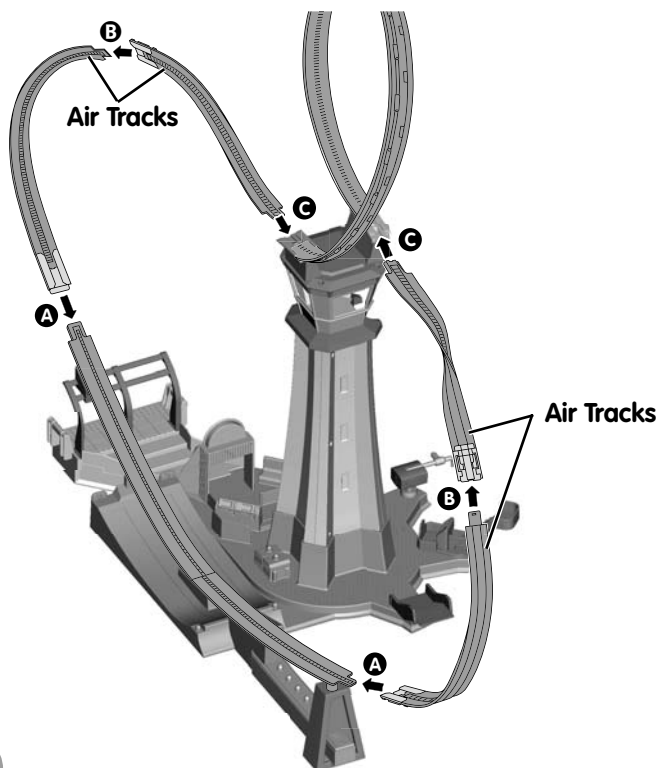

4

- Fit the loading station onto the terminal base.

7

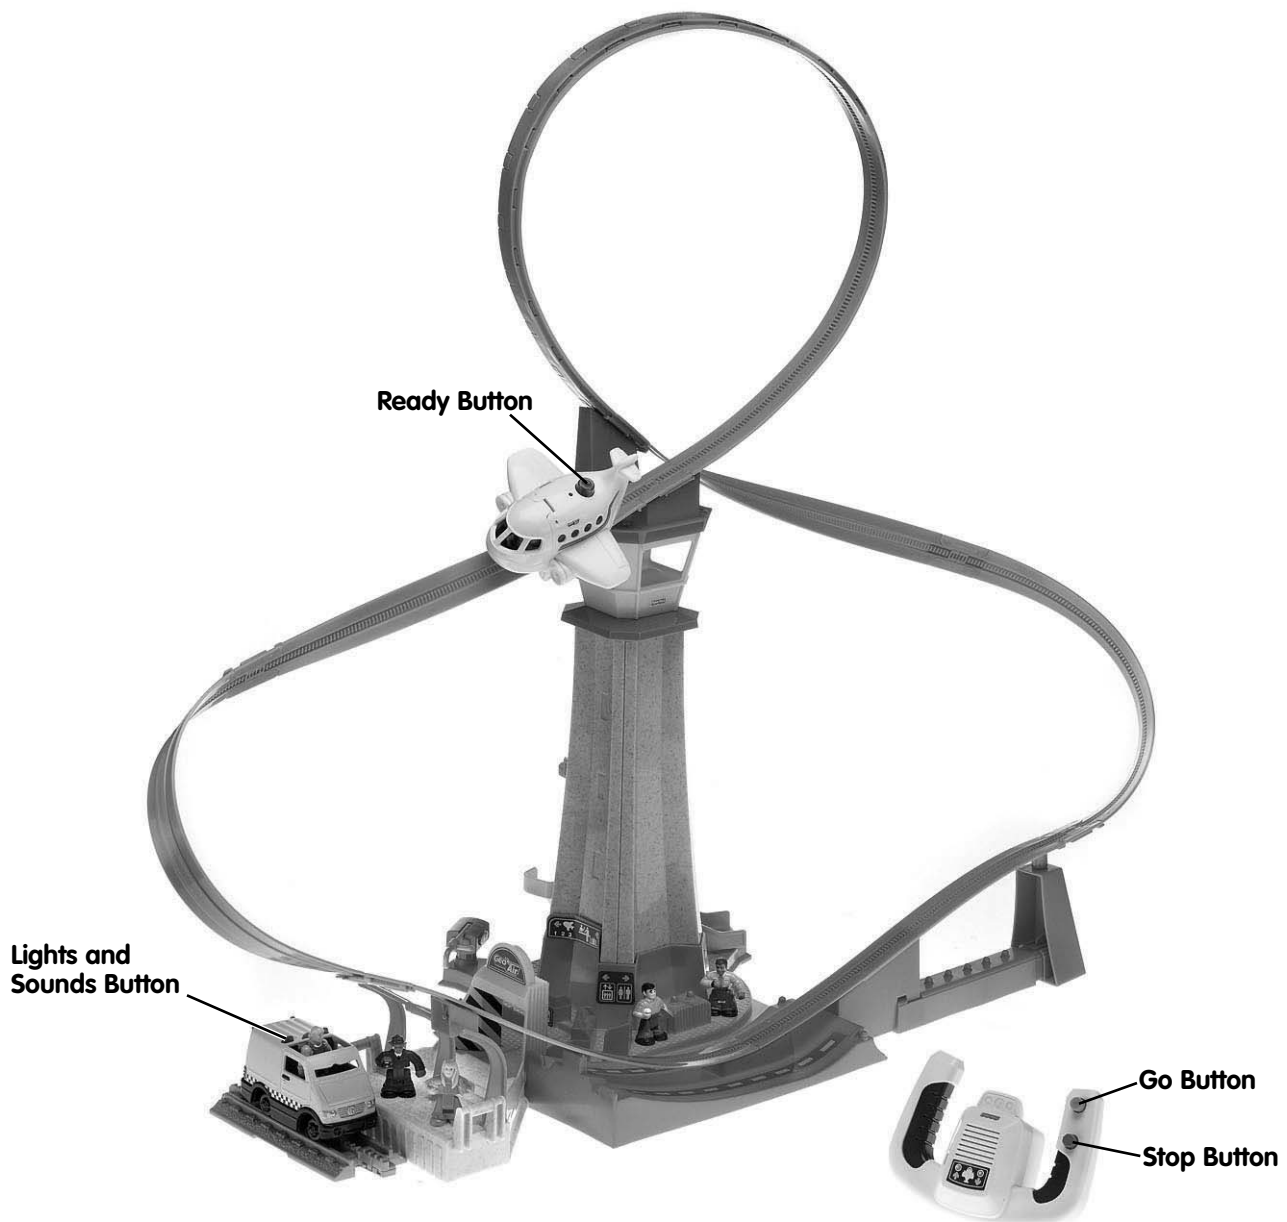

- Fit the track with tabs into the slots in the terminal and the trestle assembly. Push down to “snap” in place.

8

- Slide to attach an air track to each free end of the track on the base assembly **A**.
- Fit an air track onto each end of the track assembly **B**.
- Attach the remaining ends of the air track **C**.

■ Up, up and away!

- Fit the airplane onto the air track.
 - Press the ready button on top of the airplane to turn it on. It's ready for take-off!
 - Press the go button on the remote controller to start the airplane.
 - Press the stop button on the remote controller to stop the airplane.
- Note:** The airplane will go into sleep mode after five minutes of inactivity. Press the ready button on top of the airplane to wake it up. Then press the go button on the remote controller to start the airplane.
- This toy works best if you have a clear path between the remote controller and the vehicle. Point the remote controller at the airplane. The maximum range of the remote controller is about 12 feet.
 - Press the button on top of the vehicle for exciting lights and sounds.

Troubleshooting

SYMPTOM	SOLUTION
Airplane does not respond to the remote controller	<p>Battery power in the remote controller may be weak. Replace all three batteries in the remote controller with fresh, alkaline batteries.</p> <p>You may be beyond the maximum range of the remote controller which is about 12 feet.</p> <p>You may not have a clear path between the remote controller and the airplane. This toy works best when there are no obstructions between the airplane and the remote controller.</p> <p>Bright sunlight or fluorescent lights may affect the range of the remote controller. Try dimming the room you are playing in.</p> <p>The airplane may have shut off. If you do not operate the remote controller for a few minutes, the airplane shuts off automatically and the ready light turns off. Press the ready button on the airplane, and operate the remote controller to restart.</p>
Airplane moves slowly	<p>Battery power in the airplane may be weak. Replace all three batteries in the vehicle with fresh, alkaline batteries.</p> <p>The wheels on the airplane may be dirty. Wipe them with a clean cloth.</p>
Airplane, vehicle or remote controller begin to operate erratically	<p>Static electricity can cause the toys to operate erratically. Remove the batteries and replace them in each toy again.</p>

FCC Statement

(United States Only)

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Consult the dealer or an experienced radio/TV technician for help.

Note: Changes or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions: (1) this device may not cause harmful interference and (2) this device must accept any interference received, including interference that may cause undesired operation.

ICES-003

This Class B digital apparatus complies with Canadian ICES-003.

Operation is subject to the following two conditions: (1) this device may not cause harmful interference and (2) this device must accept any interference received, including interference that may cause undesired operation.

NMB-003

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

L'utilisation de ce dispositif est autorisée seulement aux conditions suivantes: (1) il ne doit pas produire de brouillage et (2) l'utilisateur du dispositif doit être prêt à accepter tout brouillage radioélectrique reçu, même si ce brouillage est susceptible de compromettre le fonctionnement du dispositif.
