

Color-change top!

Spray or submerge the doll under icy cold water to reveal the color change on her top. Warm water will return the top to its original color.

To avoid burns do not use water that is too hot, above 120°F/ 48°C. Color change will last longer if you do not expose this toy to intense heat or direct sunlight for prolonged periods of time. Water toys sometimes get messy. Protect play surfaces before use. Drain, rinse, clean and dry all items thoroughly before storing.
