
Use only with a Power Wheels® 6 Volt Battery with A-style Connector and Built-in Thermal Fuse and a Power Wheels® Super 6™ Volt Charger (both included).
Important Information

• Your new vehicle requires adult assembly. Please set aside at least 45 minutes for assembly.

• You must charge your battery for 18 - 30 hours before you use your vehicle for the first time. We recommend that you start charging your battery before beginning assembly. Please see Battery Charging beginning on page 8 for detailed instructions.

• Read this manual carefully for important safety information and operating instructions before using your vehicle. Keep the instructions for future reference as they contain important information.

• This vehicle is designed for use on grass, asphalt or other hard surfaces; on generally level terrain; by children 2 - 6 years of age.

• Make sure children know and follow these rules for safe driving and riding:
  - always sit in the seat.
  - always wear shoes.
  - only one (1) rider at a time.

• To prevent damaging the motors and gears, teach your child to stop the vehicle before switching between forward and reverse. Do not tow anything behind the vehicle or overload it. Do not exceed the overall maximum weight capacity of 65 lb. (30 kg), or the maximum dump bed weight capacity of 20 lbs.

• When a very lightweight child is driving the vehicle, traction may be reduced on certain types of surfaces. To improve traction, we recommend adding approximately 5 lbs. to the compartment under the seat. Do not add weight under the dump bed, motor cover, front cab or any other place on the vehicle. Add weight only under the seat. As your child grows, the extra weight can be decreased or eliminated.

• The dump bed has been designed to automatically dump any load which exceeds 20 lbs. in the center of the dump bed. Do not modify the dump bed to defeat this safety feature.

• If you have any questions about your Power Wheels® vehicle, please call our toll-free service lines at 1-800-348-0751 from 8 AM to 6 PM (EST) Monday through Friday. Trained customer service representatives are available to take your call in English or French. Habla Español? Si usted tiene alguna pregunta o neces-sita asistencia llame gratis 1-800-348-0755 para los Estados Unidos. Tenemos representantes que hablan español para atender su llamada.

• For your convenience, Power Wheels® maintains an Authorized Service Center Network with more than 400 authorized service centers nationwide. Our authorized service centers will repair or replace parts under warranty at no extra charge, and can perform non-warranty repairs for a minimal charge. Please see the Authorized Service Center list beginning on page 28 to find the authorized service center nearest you, or call 1-800-348-0751.

• Please complete and return the enclosed Registration Card today, or call 1-800-348-0751 to register your vehicle by phone.
ELECTRICAL HAZARD

⚠️ WARNING

- Battery can fall out and injure a child if vehicle tips over. Always use battery clamp.
- **PREVENT FIRE**
  - Never modify the electrical system. Alterations could cause a fire resulting in serious injury and could also ruin the electrical system.
  - Use of the wrong type battery or charger could cause a fire or explosion resulting in serious injury.
  - Use of Power Wheels® components in products other than Power Wheels® vehicles could cause overheating, fire or explosion.
- The battery must be handled by adults only. The battery is heavy and contains sulfuric acid (electrolyte). Dropping the battery could result in serious injury.
- Never allow children to charge the battery. Battery charging must be done by adults only. A child could be injured by the electricity involved in charging the battery.
- Never lift or carry the battery by the wires or connector. This can damage the battery and possibly cause a fire resulting in serious injury. Lift and carry the battery by the case only.
- Read the safety instructions on the battery.
- Examine the battery, charger and their connectors for excessive wear or damage each time you charge the battery. If damage or excessive wear is detected, do not use the charger or the battery until you have replaced the worn or damaged part.
- HOT motors. Handle carefully.

RIDING HAZARD

⚠️ WARNING

- **Prevent Injuries and Deaths**
  - Direct Adult Supervision Required
  - Keep Children Within Safe Riding Areas. These areas must be:
    - away from swimming pools and other bodies of water to prevent drownings
    - generally level to prevent tipovers
    - away from steps, driveways, roads and alleys.

⚠️ CAUTION

- In the unassembled state, this package contains small parts. Adult assembly is required.
- Use the charger in dry locations only.
• If you experience a problem with this product, or are missing a part, please call us at 1-800-348-0751, rather than return this product to the store.
• Please identify all parts before assembly and save all packaging material until assembly is complete to ensure that no parts are discarded.
• Metal parts have been coated with a lubricant to protect them during shipment. Wipe all metal parts with a paper towel to remove any excess lubricant.

ELECTRICAL HAZARD

WARNING
- Battery can fall out and injure a child if vehicle tips over. Always use battery clamp.

PREVENT FIRE
- Never modify the electrical system. Alterations could cause a fire resulting in serious injury and could also ruin the electrical system.
- Use of the wrong type battery or charger could cause a fire or explosion resulting in serious injury.
- Use of Power Wheels® components in products other than Power Wheels® vehicles could cause overheating, fire or explosion.
- The battery must be handled by adults only. The battery is heavy and contains sulfuric acid (electrolyte). Dropping the battery could result in serious injury.
- Never allow children to charge the battery. Battery charging must be done by adults only. A child could be injured by the electricity involved in charging the battery.
- Never lift or carry the battery by the wires or connector. This can damage the battery and possibly cause a fire resulting in serious injury. Lift and carry the battery by the case only.
- Read the safety instructions on the battery.
- Examine the battery, charger and their connectors for excessive wear or damage each time you charge the battery. If damage or excessive wear is detected, do not use the charger or the battery until you have replaced the worn or damaged part.

CAUTION
Use the charger in dry locations only.

About Thermal Fuses
Your Power Wheels® battery is equipped with a built-in thermal fuse. The thermal fuse is a self-resetting safety device which automatically “trips” and shuts down operation of the vehicle if the vehicle is overloaded or the driving conditions too severe. Once the fuse has “tripped”, it will automatically reset itself after approximately 25 seconds and allow the vehicle to resume normal operation. To avoid repeated automatic shutdowns, do not overload the vehicle by exceeding the 65 lb. (30 kg) maximum weight capacity or by towing anything behind the vehicle. Avoid severe driving conditions, such as driving up very steep hills or running into fixed objects, which can cause the wheels to stop spinning while power is still being supplied to the motors.

Make sure your child stops the vehicle before switching between forward and reverse.

If the thermal fuse continually trips under normal driving conditions, contact your local Power Wheels® Authorized Service Center. Please refer to the Authorized Service Center listing beginning on page 28 for the location of the Authorized Service Center nearest to you.

Important Notes
- Your new battery must be charged for at least 18 hours before you use it in your vehicle for the first time.
- You do not need to remove the battery from the vehicle to recharge it.
- The battery must be upright while charging.
- The charger is not a toy.
- Do not short circuit the battery.
- We recommend that you start charging your battery before beginning assembly of your vehicle.
- Before charging the battery, examine the battery case for cracks and other damage which may cause sulfuric acid (electrolyte) to leak during the charging process. If damage is detected, do not charge the battery or use it in your vehicle. Battery acid is very corrosive and can cause severe damage to surfaces it contacts.
- Do not charge the battery on a surface which could be damaged by the acid contained inside the battery. Take precautions to protect the surface on which you charge your battery.
- Use only a Power Wheels Super 6 Volt charger with an A-style connector (120VAC 60 Hz 15W with an output of 6VDC 7.2W) to charge your 6 volt battery.
• Plug the charger and battery connectors together. Push firmly to make sure the two connectors are completely joined.

GAP
Incorrect

2

NO GAP
Correct

• Plug the charger into a standard 120 volt wall outlet.
Note: If power flow to the wall outlet is controlled by a switch, make sure the switch is “ON”.

• **Before first time use, charge the battery for at least 18 hours.** Never charge the battery longer than 30 hours.

• **Recharge the battery for at least 14 hours** after each use of your vehicle. Do not charge the battery longer than 30 hours.

• Once the battery is charged, disconnect the charger connector from the battery connector. Unplug the charger from the wall outlet. The battery is now charged and is ready to be installed in your vehicle. Please see “Battery Installation” on page 18 for detailed battery installation instructions.
**WARNING**

Children can be harmed by small parts, sharp edges and sharp points in the vehicle's unassembled state, or by electrical items. Care should be taken in unpacking and assembly of the vehicle. Children should not handle parts, including the battery, or help in assembly of the vehicle.

**1**

- Make sure the area where the labels will be applied are clean and dry. For best adhesion, avoid repositioning the labels once they are applied to the vehicle.
- Apply the labels to the dashboard, as shown.

**2**

- Insert and snap the shift lever, key assembly and knobs into the dashboard, as shown.

**3**

- Insert the end of the microphone cord through the small, round hole in the dashboard.
- Bend the plastic tip at the end of the microphone cord so that it forms a "T" behind the dashboard.
- Pull gently on the microphone cord to make sure it is secure in the dashboard.
- To hang the microphone on the dashboard, fit the tab on the back of the microphone into the oval hole in the dashboard.

**4**

- Fit the dashboard on the vehicle body, as shown.
- Insert four #8 x 3/4" screws through the holes in the dashboard and into the vehicle body.
- Tighten the screws with a Phillips screwdriver. Do not over-tighten.
5

- Slide the front wheels off the front axles.

6

- Slide a 7/16" washer onto one of the front axles.
- Slide an axle bushing onto the front axle. Make sure the axle bushing is positioned as shown in the illustration, with the ring facing the washer.
- Slide a front wheel onto the front axle. Make sure the peg on the front wheel is facing outward.
- Slide a hubcap onto the front axle. Turn the hubcap to make sure it fits completely into the center of the wheel.

7

- Fit a large cap nut on the end of the front axle.
- Tap the cap nut gently with a hammer to secure it on the end of the front axle.
- Pull on the wheel to be sure the cap nut is firmly attached to the front axle.
- Repeat assembly steps 5 and 6 to assemble the other front wheel.

8

- Face the front of the vehicle.
- Fit the tabs extending from the bottom of the grille into the rectangular slots above the front bumper.
- Push on the grille to snap the tabs on the back of the grille into the slots in the front of the vehicle body.
• Make sure the areas where the labels will be applied are clean and dry. For best adhesion, avoid repositioning the labels once they are applied to the vehicle.
• Align the slots in the headlight labels with the headlight guard slots in the hood. Apply the headlight labels as shown.

• Using safety scissors, separate the round headlight guards from the plastic connector. Dispose of the plastic connector.
• Fit the tabs on the back of the headlight guards into the slots in the front of the hood.
• Push firmly to snap the tabs into the hood.

• Fit the two halves of the exhaust stack together. Insert two #6 x 1 1/2” screws into the exhaust stack. Tighten the screws with a Phillips screwdriver. Do not overtighten.
• Fit the end of the exhaust stack into the large hole in the top of the vehicle body. Push firmly until the exhaust stack “snaps” into the vehicle body.

• Turn the vehicle body on its side.
• Align the hole in the wire retainer with the screw peg in the underside of the vehicle body, near the footswitch.
• Insert a #8 x 1/2” screw through the wire retainer and into the screw peg.
• Tighten the screw with a Phillips screwdriver. Do not over-tighten.
• Place the steering column into the hole in the vehicle body.

• Slide the straight end of the steering column up through the hole in the vehicle body and out through the hole in the dashboard.

• Wipe the steering column with a paper towel to remove any excess lubricant.

• Slide the straight end of the steering column up through the hole in the vehicle body and out through the hole in the dashboard.

• Wipe the steering column with a paper towel to remove any excess lubricant.

• Slide the straight end of the steering column up through the hole in the vehicle body and out through the hole in the dashboard.

• Turn the vehicle body upright.

• Position the steering wheel so that the spokes form a “Y”, as shown.

• Fit the steering wheel onto the straight end of the steering column.

Hint: You may want the help of another adult to support the curved end of the steering column near the steering linkage while assembling the steering wheel to your vehicle.

• Fit a small cap nut onto the straight end of the steering column.

• Tap the cap nut gently with a hammer to secure it.

• Pull up on the steering wheel to make sure the cap nut is firmly attached to the end of the steering column.
**17**

- Align the notch in the steering wheel cap with the tab in the center of the steering wheel. Fit the steering wheel cap onto the steering wheel.
- Insert a #8 x 1” screw into each of the holes in the steering wheel cap.
- Tighten the screws with a Phillips screwdriver. Do not over-tighten.

---

**18**

- Fit the tabs on the seat into the holes in the vehicle body.
- Push firmly near each of the tabs to snap them into the vehicle body.

---

**19**

- Separate the two halves of the dump bed handle.
- Fit the large spring onto the circular peg on the inside of the bottom half of the dump bed handle.

---

**20**

- Re-assemble the two halves of the dump bed handle. Make sure the end of the spring contacts the inside part of the circle on the upper half of the dump bed handle.
**Assembly**

21

- Align the holes in the upper and lower halves of the dump bed handle. Insert a #10 x 1¼" shoulder bolt through the dump bed handle, as shown above.
- Fit a #10 - 32 acorn nut on the end of the shoulder bolt. Do not reverse the position of the shoulder bolt and acorn nut.
- Use pliers to hold the acorn nut steady and tighten the shoulder bolt with a Phillips screwdriver. Do not over-tighten.
- Squeeze the dump bed handle to make sure the bottom half moves freely. If it is too tight, loosen the shoulder bolt and acorn nut slightly.

23

- Insert a small spring into each hinge pin endcap.
- Fit a hinge pin endcap onto each end of the hinge pin.

24

- Push in on the hinge pin endcaps to fit the endcaps through the holes in the dump bed.
- Release the endcaps to secure the hinge pin in the dump bed.

22

- Position the dump bed upside down.
- Fit the stem on the dump bed handle into the square opening in the bottom of the dump bed.
- Insert a #10 x 1" screw up through the hole in the dump bed and into the dump bed lever.
- Tighten the screw with a Phillips screwdriver. Do not over-tighten.
Face the rear of the vehicle.
Position the dump bed upright with the hinge pin towards you.
Push in on the hinge pin endcaps to fit the endcaps into the small grooves in the vehicle body.
Push down on the dump bed to slide the endcaps down the grooves and snap them into the holes in the vehicle body. **Make sure the endcaps “snap” into the holes in the vehicle body.**

**Insert and “snap” the gas cap into the hole in the side of the vehicle body.**

**One-time assembly is now complete.**

One extra small cap nut and two extra large cap nuts are included with your vehicle. **Make sure you do not have any extra washers or axle bushings.** If you have extra washers and/or axle bushings, you have probably incorrectly assembled the front wheels.

To correct the front wheel assembly, use pliers to firmly squeeze the cap nut on the end of each front axle and remove it. Discard the used cap nuts. Reread and repeat assembly steps 5 through 7 to re-assemble the front wheels.

• Make sure the areas where the labels will be applied are clean and dry. For best adhesion, avoid repositioning the labels once they are applied to the vehicle.
• Apply the taillight labels as shown.
Proper label application will help to keep the labels looking their best! When applying labels, keep the following guidelines in mind:

- Wash your hands before applying the labels.
- Before applying the labels, wipe the surface of the vehicle with a clean, dry cloth to remove any dust or oils.
- Place the labels exactly as shown in the illustrations.
- For best results, avoid repositioning a label once it has been applied to the vehicle.
- After applying a label, rub the label firmly with a clean, dry cloth to make sure the label is adhered to your vehicle. Start at the center of a label, and smooth towards the outer edges to remove air bubbles.
IMPORTANT! Use only a Power Wheels® 6 volt battery with A-style connector and built-in thermal fuse. Use of any other battery will damage your vehicle. Make sure that you charge the battery for at least 18 hours using the enclosed Power Wheels® Super 6™ Volt charger before operating your vehicle for the first time. Charge the battery for at least 14 hours after each use of the vehicle. Never charge the battery longer than 30 hours. Failure to follow these instructions may damage your battery and will void your warranty.

**WARNING**

The battery and the vehicle hood provide weight needed for vehicle stability. **DO NOT** move the battery to another location. Refasten the hood before operating the vehicle.

1. **Using a slotted screwdriver, rotate the lock fasteners ¼ turn to unlock the hood.**
2. **Open the hood.**

2. **Place the battery upright in the battery compartment.**
3. **With the ends of the battery clamp curving up, fit the ends of the battery clamp into the slots in the battery compartment wall.**
4. **Lower the battery clamp over the battery, and insert a #8 x ⅞” screw through the bend in the battery clamp and into the vehicle body.**
5. **Tighten the screw with a Phillips screwdriver. Do not over-tighten.**
• Plug the battery connector and motor harness connector together. Push firmly to make sure the two connectors are completely joined.

• Lower the hood.
• Rotate the lock fasteners 1/4 turn to lock the hood and prevent children from accessing the battery.
Battery Care and Disposal

Care

If a battery leak develops, avoid contact with the leaking acid and place the damaged battery in a plastic bag. See information below for proper disposal.

If acid comes in contact with skin or eyes, flush with cool water for at least 15 minutes and call a physician.

If acid is internally ingested, give water, milk of magnesia or egg whites immediately. Never give emetics or induce vomiting. Call a physician.

• Charge a new battery for at least 18 hours before first use. Never charge the battery longer than 30 hours. Overcharging or undercharging the battery may shorten battery life and decrease vehicle running time.

• After the first charge, recharge the battery for at least 14 hours after each use. Never charge the battery longer than 30 hours. Charge the battery after each use, regardless of how long the vehicle was used.

• The battery must be upright while charging.

• Do not allow the battery to run down completely before charging.

• Charge the battery before storing the vehicle.

• Always remove an exhausted battery from the vehicle. Battery leakage and corrosion can damage the vehicle.

• Charge the battery at least once per month, even if the vehicle has not been used.

• Leaving the battery in a discharged condition will ruin it.

• Do not store the battery in temperatures above 75° F or below -10° F.

• Prevent the battery from moving freely inside the battery compartment. Always use the battery clamp to secure the battery in the battery compartment.

• Examine the battery, charger and their connectors for excessive wear or damage each time you charge the battery. If damage is detected, do not use the charger or the battery until you have replaced the worn or damaged part.

Disposal

• Your Power Wheels® battery is a sealed lead-acid battery. It must be recycled or disposed of in an environmentally sound manner.

• Do not dispose of a lead-acid battery in your regular, household trash. The incineration, landfilling or mixing of sealed lead-acid batteries with household trash is prohibited by law in most areas.

• Return exhausted batteries to a federal or state approved lead-acid battery recycler, such as a Power Wheels® authorized service center, or a local seller of automotive batteries. For the authorized service center location nearest to you, please call 1-800-348-0751. Contact your local waste management officials for other information regarding the environmentally sound collection, recycling and disposal of lead-acid batteries. If you live in the State of Florida or the State of Minnesota, it is prohibited by law for anyone to throw away lead-acid batteries in the municipal waste stream.
Teach Safety Rules to Children

While children can quickly develop the skill necessary to drive this vehicle, it is important to remember that their judgment skills are still very immature. Unsupervised driving by children can lead to serious injury. Before children use this vehicle, an adult should carefully evaluate the driving area as well as the children's skill level and ability to drive this vehicle safely. Children are not always able to recognize or anticipate hazards, even when they have been taught about them. There is no acceptable substitute for direct adult supervision.

Teach appropriate safety rules to your child before allowing operation of this vehicle. These rules should also be reviewed with neighborhood children or other playmates who want to drive this vehicle.

Riding Rules

Make sure children know and follow these rules for safe driving:

1. Always sit on the seat.
2. Always wear shoes.
3. Only 1 (one) rider at a time. Children that are not sitting on the seat or are standing on the vehicle could fall off, cause a tip-over or block the driver’s view. Children could be seriously injured.
4. Do not allow any child to drive the vehicle in the street or near moving (motorized) vehicles.
5. Do not allow any child to drive near bodies of water (such as pools or creeks), obstructions (such as furniture, low tree limbs or play equipment), or drop-offs (such as stairs or decks).
6. Do not allow any child to drive the vehicle in the dark. A child could encounter unexpected obstacles and have an accident. Operate the vehicle only in the daytime or a well-lit area.

7. Do not allow your child to drive on sloped or inclined surfaces. Restrict your child’s driving to generally level ground only!
8. Do not allow your child to drive down or across a steep slope.
   - The vehicle may gain unsafe speed, even if the pedal is released to stop.
   - The vehicle may tilt and tip over.
   - The wheels could lose traction, causing the vehicle to slip.
9. Do not allow your child to drive up steep inclines. The motor may stop and the vehicle could roll backwards at an unsafe speed.
10. Never put anything near any moving parts. Rotating parts such as motors, gear boxes and wheels can snag fingers, hair, etc., causing serious injury. Do not allow operation of the vehicle when it is on its side or in an upside-down position.
11. Do not operate the vehicle near flammable vapors (gasoline, paint thinner, acetone, liquid wax, etc.). The vehicle’s electrical switches, like most electrical switches, emit an internal spark when first turned on or turned off. The presence of flammable liquids or vapors could cause an explosion or a fire. Keep all flammable products in tightly sealed containers and away from the vehicle.
12. Do not allow a child to operate the vehicle without direct adult supervision. To prevent unsupervised use of the vehicle, disconnect the motor harness from the battery when the vehicle is not in use.

To disconnect the motor harness connector and battery connector:

- Using a slotted screwdriver, rotate the lock fasteners 1/4 turn to unlock the hood.
- Open the hood.
- Unplug the motor harness and battery connectors.
- Close the hood and lock the lock fasteners.

IMPORTANT! Always remember to lock the lock fasteners on the hood to prevent children from accessing the battery.
• Push the button on the left side of the FORWARD /REVERSE switch to set the vehicle to drive forward. The FORWARD/REVERSE switch is located on the dashboard directly under the steering wheel.
• Press down on the foot pedal. The vehicle will go forward at a maximum of 3½ mph.
• Help your child practice steering to learn how far and how quickly to turn the steering wheel when driving forward.

IMPORTANT! Always stop the vehicle before switching between FORWARD and REVERSE.
• Push the button on the right side of the FORWARD /REVERSE switch to set the vehicle to drive in reverse. The FORWARD/REVERSE switch is located on the dashboard directly under the steering wheel.
• Press down on the foot pedal. The vehicle will back up at a maximum of 3½ mph.
• Help your child practice steering to learn how far and how quickly to turn the steering wheel when driving in reverse.
How to Operate Your Vehicle

Using the Dump Bed

- Squeeze the dump handle on the dump bed and pull up on the handle.
- Push down on the dump handle to return the dump bed to the upright position.

IMPORTANT!
- When using the dump bed, take care to keep fingers away from the dump handle latch opening.
- Keep children and animals out of the dump bed.
- Do not overload the dump bed by loading more than 20 lbs. in the dump bed. Remember that the dump bed will automatically dump any load over 20 lbs. Do not defeat the auto-dump feature.
- Do not lean over the dump bed while it is in operation.
- Make sure there is no one standing behind the dump bed when loading or unloading.
- Keep fingers and other body parts out from under the dump bed area and away from the area between the dump bed and the seat.

- Check all screws, cap nuts and their protective coverings regularly and tighten as required. Check plastic parts on a regular basis for cracks or broken pieces.
- During snowy or rainy weather, the vehicle should be stored inside or under a protective cover. Remember to charge the battery at least once per month while your vehicle is not in regular use.
- Avoid operating the vehicle in wet or snowy conditions, and do not spray the vehicle with a hose. Do not wash the vehicle with soap and water. Water or moisture in the motors or electrical switches can cause them to corrode, and could cause switch or motor failure.
- Avoid operating the vehicle on sand, loose dirt or gravel. Sand, loose dirt or gravel in the motors or electrical switches can cause them to jam, and could cause switch or motor failure.
- The vehicle can be wiped down with a soft, dry cloth. For a shiny finish, you can wipe plastic parts with a non-wax furniture polish applied to a soft-cloth. Do not use automotive wax. Do not use soap and water or spray the vehicle with a hose.
- Regular cleaning under the dump bed will prevent excessive dirt from coming into contact with the motor and gearbox. Remove the dump bed from the vehicle and clean the area by vacuuming or by wiping the area with a soft, dry cloth. Do not spray the vehicle with water. To remove the dump bed:
  - Place the dump bed in the unloading position.
  - Squeeze the hinge pin endcaps toward the center of the dump bed.
  - Lift the dump bed to remove it.
- To ensure that your vehicle stays in good operating order, we recommend that you periodically have your vehicle checked by a Power Wheels® authorized service center. See page 28 for the list of authorized service centers or call 1-800-348-0751 for the location of the authorized service center nearest you.
Bumper-to-Bumper* Limited Warranty

*One year limited warranty from date of purchase on Power Wheels® vehicle.
Six month limited warranty on 6 volt battery.

For the original purchaser, this one year limited warranty covers the Power Wheels® ride-on vehicle (purchased from Power Wheels®) against defects in materials and workmanship. The six month limited warranty applies only to the 6 volt battery included by Power Wheels® with the original purchase of the vehicle.

This warranty covers normal use and does not cover the Power Wheels® vehicle or battery if it has been damaged by unreasonable use, neglect, accident, abuse, misuse, improper service or other causes not arising out of defects in materials or workmanship. Evidence of any attempt at consumer repair will void this warranty.

THIS WARRANTY DOES NOT COVER, AND IS INTENDED TO EXCLUDE, ANY LIABILITY ON THE PART OF POWER WHEELS®, WHETHER UNDER THIS WARRANTY OR IMPLIED BY LAW, OR ANY INDIRECT OR CONSEQUENTIAL DAMAGES FOR BREACH OF WARRANTY. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION, SO THIS LIMITATION MAY NOT APPLY TO YOU.

Should you need service or assistance with your vehicle during the warranty period, do not return this vehicle to the store. Power Wheels® has provided a nationwide network of authorized service centers. Please refer to the list in this manual. Power Wheels® is continually expanding our Authorized Service Center Network. If there is not an authorized service center in your area, please call Consumer Relations for information, 1-800-348-0751.

This warranty gives you specific legal rights, and you may also have other rights which may vary from state to state.

Please save your original sales receipt.
# Problems and Solutions Guide

**IMPORTANT!** If you experience a problem with your vehicle, first check the Problems and Solutions Guide below. If you still experience a problem, please contact Power Wheels® Consumer Relations, toll-free at **1-800-348-0751** between 8 AM and 6 PM (EST) Monday through Friday. Or, contact your local Power Wheels® authorized service center. For the location nearest you, please refer to the Authorized Service Center list beginning on page 28.

<tbody>
<tr>
<td>Vehicle does not run</td>
<td>Undercharged battery</td>
<td>Charge the battery. A new battery should have been charged for at least 18 hours before using the vehicle for the first time. After first-time use, recharge the battery for at least 14 hours after each use. Never charge the battery longer than 30 hours. Check all connectors. Make sure the battery connector is tightly plugged into the charger connector, and that the charger is plugged into the wall. Make sure power flow to the wall outlet is “ON”.</td>
</tr>
<tr>
<td>Chargers is not working</td>
<td></td>
<td>There is no sure way to tell if your charger is working unless you have a volt meter. If you suspect there is a problem with your charger, contact your local Power Wheels® authorized service center. They can test your charger for you.</td>
</tr>
<tr>
<td>Tripped thermal fuse in battery</td>
<td></td>
<td>The built-in thermal fuse may “trip” and shut down operation of the vehicle if the vehicle is overloaded or the driving conditions are too severe. The fuse will automatically reset itself after approximately 25 seconds allowing the vehicle to resume normal operation. To avoid repeated automatic shut downs, do not overload the vehicle by exceeding the 65 lb. maximum weight capacity or by towing anything behind the vehicle. Do not drive up hills or run into fixed objects, which can cause the wheels to stop spinning while power is still being supplied to the motors. If the thermal fuse continually trips, contact your local Power Wheels® authorized service center.</td>
</tr>
<tr>
<td>Loose wire or loose connectors</td>
<td></td>
<td>Check all wires and connectors. Make sure the battery connector is tightly plugged into the motor harness connector, and that there are no loose wires around the motor.</td>
</tr>
<tr>
<td>Dead battery</td>
<td></td>
<td>If your battery is old or if you have not followed Battery Care instructions, your battery may be dead. If you are unsure whether or not the battery is dead, you can have it tested at your local Power Wheels® authorized service center.</td>
</tr>
<tr>
<td>Electrical switch damage</td>
<td></td>
<td>The electrical switches can become corroded due to exposure to water or moisture, or can jam due to loose dirt, sand or gravel. Contact your local Power Wheels® authorized service center for diagnosis and repair.</td>
</tr>
<tr>
<td>Motor damage</td>

<tr>
<td>Vehicle runs sluggishly</td>
<td>Undercharged battery</td>
<td>Charge the battery. A new battery should have been charged for at least 18 hours before using the vehicle for the first time. After first-time use, recharge the battery for at least 14 hours after each use. Never charge the battery longer than 30 hours. Check all connectors. Make sure the battery connector is tightly plugged into the charger connector, and that the charger is plugged into the wall. Make sure power flow to the wall outlet is “ON”.</td>
</tr>
<tr>
<td>Battery needs charging</td>
<td></td>
<td>Be sure to charge the battery after each use.</td>
</tr>
<tr>
<td>Battery is old and will not accept full charge</td>
<td></td>
<td>Even with proper care, rechargeable batteries do not last forever. Average battery life is 1 to 3 years depending on the vehicle use and use conditions. Replace the battery with a Power Wheels® 6 volt battery with A-style connector and built-in thermal fuse. For best performance, do not substitute parts.</td>
</tr>
<tr>
<td>Vehicle is overloaded</td>
<td></td>
<td>Make sure you do not overload the vehicle by allowing more than one rider at one time, by exceeding the 65 lb. maximum weight capacity, or by towing objects behind the vehicle. If the vehicle is overloaded, the built-in thermal fuse in the battery may “trip” and automatically shut down operation of the vehicle for approximately 25 seconds. Reduce the load on the vehicle to prevent repeated automatic shutdowns.</td>
</tr>
<tr>
<td>Driving conditions are too stressful</td>
<td></td>
<td>Use only on generally level ground.</td>
</tr>
<tr>
<td>Sometimes the vehicle doesn’t run, but other times it does</td>
<td>Loose wire or connector</td>
<td>Check all wires around the motor and all connectors to make sure they are tight.</td>
</tr>
<tr>
<td></td>
<td>Motor or electrical switch damage</td>
<td>Contact your local Power Wheels® authorized service center for diagnosis and repair.</td>
</tr>
<tr>
<td>When the foot pedal is pressed, the vehicle won’t run without a push</td>
<td>Loose wire or connector</td>
<td>Check all wires around the motor and all connectors to make sure they are tight.</td>
</tr>
<tr>
<td></td>
<td>“Dead Spot” on motor</td>
<td>Contact your local Power Wheels® authorized service center for diagnosis and repair.</td>
</tr>
<tr>
<td>Built-in fuse constantly trips</td>
<td>Child is switching between forward and reverse without stopping</td>
<td>Teach your child to stop the vehicle before switching direction.</td>
</tr>
<tr>
<td>Loud clacking or grinding noise from a motor-gearbox</td>
<td>Broken gears</td>
<td>Contact your local Power Wheels® authorized service center for diagnosis and repair.</td>
</tr>
<tr>
<td>Charger gets warm during use</td>
<td>It is normal for some chargers to get warm during use and is not reason for concern.</td>
<td>No action required. If your charger does not get warm during use, it does not mean that it is not working properly.</td>
</tr>
<tr>
<td>Battery makes a sizzling or gurgling noise when charging</td>
<td>It is normal for some batteries to make noise and swell slightly while charging and is not reason for concern.</td>
<td>No action required. If your battery does not make noise or swell slightly during charging, it does not mean that it is not accepting the charge.</td>
</tr>

Authorized Service Centers
IMPORTANT!

DO NOT use this vehicle for the first time until you have charged the battery for 18 hours.

Remember to…
✓ Charge the battery immediately after each use.
✓ Charge the battery once a month during storage, even if the vehicle has not been used.

Failure to follow these instructions will permanently damage your battery and void your warranty. Please refer to the Battery Care Section in this manual for more information.

DO NOT Return your Vehicle to the Store!

If you are missing parts or need assistance, please call us toll-free:

Power Wheels® Consumer Relations
1-800-348-0751
8 AM - 6 PM EST, Monday through Friday.

Or contact your local Power Wheels® Authorized Service Center.

For the location nearest you, refer to the Authorized Service Center list in this manual.
