

Barbie™ Trail Rider

Product features may vary from the picture above.

Please read this manual and save it with your original sales receipt.

Tools needed for assembly: Phillips Screwdriver, Slotted Screwdriver, Hammer and Pliers (not included); Cap Nut Assembly Tool (included).

Use only with a Power Wheels® 6 Volt Rechargeable Battery with A-Style Connector and Built-in Thermal Fuse and a Power Wheels® Super 6™ Volt Charger (both included).

A

Important Information

- Your new vehicle requires adult assembly. Please set aside at least 45 minutes for assembly.
- You must charge your battery for 18 - 30 hours **before you use your vehicle for the first time**. We recommend that you start charging your battery before beginning assembly. Please see Battery Charging beginning on page 7 for detailed instructions.
- Read this manual carefully for important safety information and operating instructions before using your vehicle. Keep this manual for future reference as it contains important information.
- This vehicle is designed for use on grass, asphalt or other hard surfaces; on generally level terrain; by children 3 - 6 years of age.
- Make sure children know and follow these rules for safe driving and riding:
 - always sit in the seat.
 - always wear shoes.
 - only one (1) rider at a time.
- Use this vehicle **ONLY** outdoors. Most interior flooring can be damaged by riding this vehicle indoors. Fisher-Price® will not be responsible for damage to the floor if the vehicle is used indoors.
- To prevent damaging the motors and gears, teach your child to stop the vehicle before switching between forward and reverse. Do not tow anything behind the vehicle or overload it. Do not exceed the maximum weight capacity of 65 lb (29.5 kg).
- If you have any questions about your Power Wheels® vehicle, please call our toll-free service lines at **1-800-348-0751** from 8 AM to 6 PM (EST) Monday through Friday. Trained customer service representatives are available to take your call in English or French. Habla Español? Si usted tiene alguna pregunta ó necesita asistencia llame gratis **1-800-348-0755** para los Estados Unidos. Tenemos representantes que hablan español para atender su llamada.
- For your convenience, Power Wheels® maintains an **independently owned and operated** Authorized Service Center Network with more than 400 authorized service centers nationwide. The authorized service centers will repair or replace parts under warranty at no extra charge, and can perform non-warranty repairs for a minimal charge. Please see the Authorized Service Center list beginning on page 24 to find the authorized service center nearest you, or call **1-800-348-0751**.
- Please complete and return the enclosed Registration Card today, or call **1-800-348-0751** to register your vehicle by phone, or register on-line at www.powerwheels.com.

B

Warnings and Cautions

ELECTRICAL HAZARD

WARNING

- Battery can fall out and injure a child if vehicle tips over. Always use battery clamp.
- **PREVENT FIRE**
 - Never modify the electrical system. Alterations could cause a fire resulting in serious injury and could also ruin the electrical system.
 - Use of the wrong type battery or charger could cause a fire or explosion resulting in serious injury.
 - Use of Power Wheels® components in products other than Power Wheels® vehicles could cause overheating, fire or explosion.
- The battery must be handled by adults only. The battery is heavy and contains sulfuric acid (electrolyte). Dropping the battery could result in serious injury.
- Never allow children to charge the battery. Battery charging must be done by adults only. A child could be injured by the electricity involved in charging the battery.
- Never lift or carry the battery by the wires or connector. This can damage the battery and possibly cause a fire resulting in serious injury. Lift and carry the battery by the case only.
- Read the safety instructions on the battery.
- Examine the battery, charger and their connectors for excessive wear or damage each time you charge the battery. If damage or excessive wear is detected, do not use the charger or the battery until you have replaced the worn or damaged part.
- **HOT** motors. Handle carefully.

RIDING HAZARD

WARNING

- **Prevent Injuries and Deaths**
 - Direct Adult Supervision Required
 - Keep Children Within Safe Riding Areas.
These areas must be:
 - away from swimming pools and other bodies of water to prevent drownings
 - generally level to prevent tipovers
 - away from steps, driveways, cars, roads and alleys.

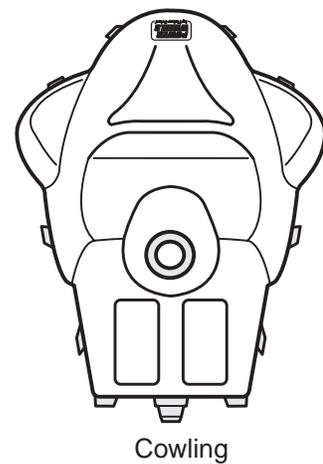

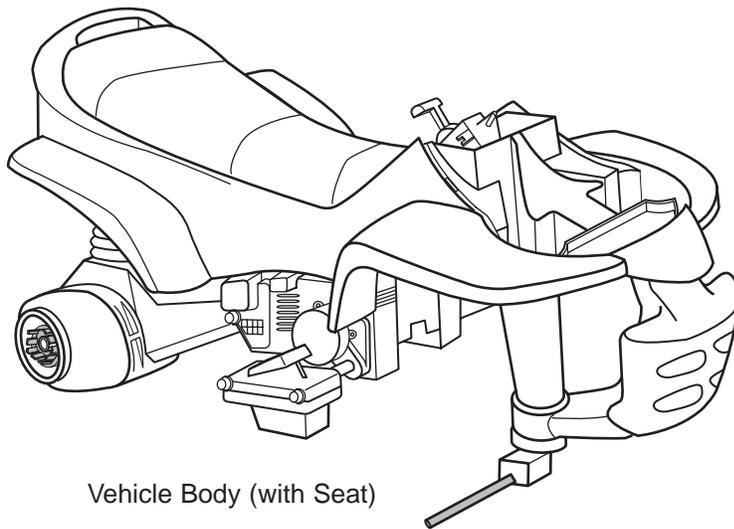

CAUTION

- In the unassembled state, this package contains small parts. Adult assembly is required.
- Use the charger in dry locations only.

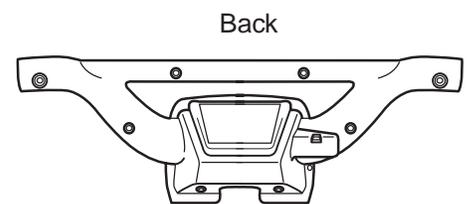

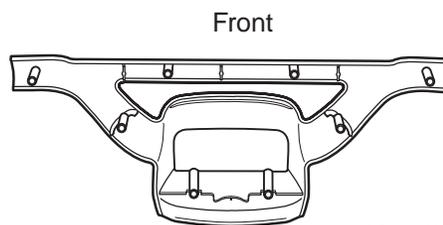

C

Parts

- If you experience a problem with this product, or are missing a part, please call us at **1-800-348-0751**, rather than return this product to the store.
- Please identify all parts before assembly and save all packaging material until assembly is complete to ensure that no parts are discarded.
- Some parts were placed under the seat for shipment. Press the tab under the back of the seat and lift to access the battery compartment.
- Metal parts have been coated with a lubricant to protect them during shipment. Wipe all metal parts with a paper towel to remove any excess lubricant.

ELECTRICAL HAZARD**WARNING**

- Battery can fall out and injure a child if vehicle tips over. Always use battery clamp.
- **PREVENT FIRE**
 - Never modify the electrical system. Alterations could cause a fire resulting in serious injury and could also ruin the electrical system.
 - Use of the wrong type battery or charger could cause a fire or explosion resulting in serious injury.
 - Use of Power Wheels® components in products other than Power Wheels® vehicles could cause overheating, fire or explosion.
- The battery must be handled by adults only. The battery is heavy and contains sulfuric acid (electrolyte). Dropping the battery could result in serious injury.
- Never allow children to charge the battery. Battery charging must be done by adults only. A child could be injured by the electricity involved in charging the battery.
- Never lift or carry the battery by the wires or connector. This can damage the battery and possibly cause a fire resulting in serious injury. Lift and carry the battery by the case only.
- Read the safety instructions on the battery.
- Examine the battery, charger and their connectors for excessive wear or damage each time you charge the battery. If damage or excessive wear is detected, do not use the charger or the battery until you have replaced the worn or damaged part.

**CAUTION**

Use the charger in dry locations only.

About Thermal Fuses

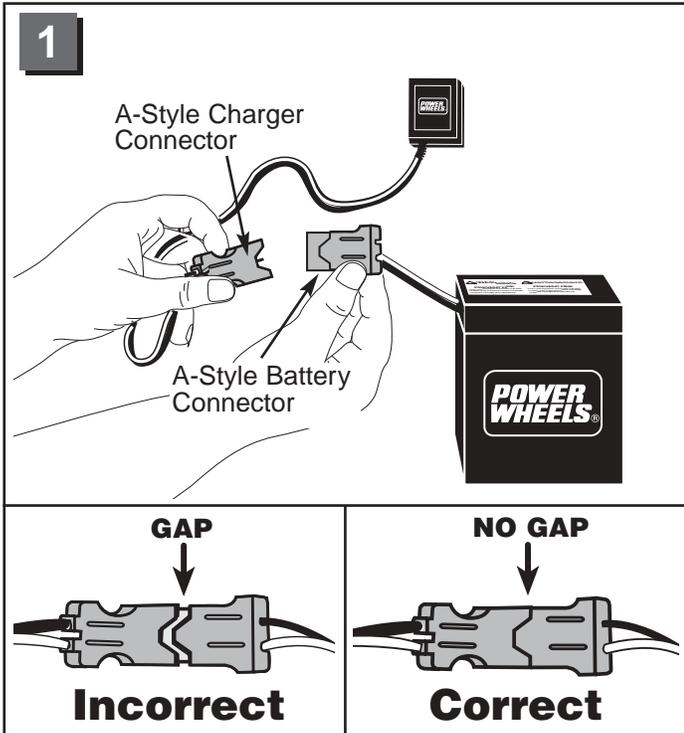

Your Power Wheels® battery is equipped with a built-in thermal fuse. The thermal fuse is a self-resetting safety device which automatically “trips” and shuts down operation of the vehicle if the vehicle is overloaded or the driving conditions too severe. Once the fuse has “tripped”, it will automatically reset itself after approximately 25 seconds and allow the vehicle to resume normal operation. To avoid repeated automatic shutdowns, do not overload the vehicle by exceeding the 65 lb (29.5 kg) maximum weight capacity or by towing anything behind the vehicle. Avoid severe driving conditions, such as driving up very steep hills or running into fixed objects, which can cause the wheels to stop spinning while power is still being supplied to the motors. Make sure your child stops the vehicle before switching between forward and reverse.

If under normal use conditions the thermal fuse continually trips, contact your local Power Wheels® Authorized Service Center. Please refer to the Authorized Service Center listing beginning on page 24 for the location of the Authorized Service Center nearest to you.

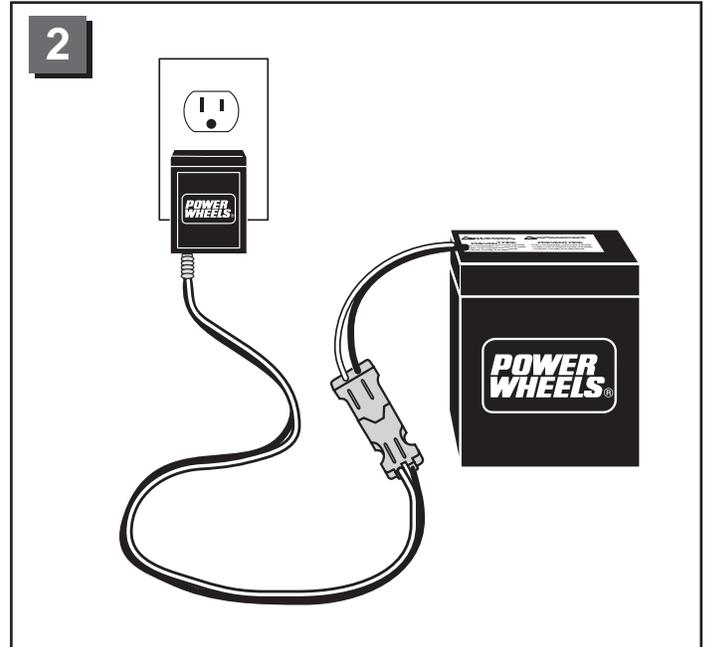

Important Notes

- **Your new battery must be charged for at least 18 hours before you use it in your vehicle for the first time.**
- We recommend that you start charging your battery before beginning assembly of your new vehicle.
- The battery must be upright while charging.
- The charger is not a toy.
- Do not short circuit the battery.
- You do not need to remove the battery from your vehicle to recharge it.
- Before charging the battery, examine the battery case for cracks and other damage which may cause sulfuric acid (electrolyte) to leak during the charging process. If damage is detected, do not charge the battery or use it in your vehicle. Battery acid is very corrosive and can cause severe damage to surfaces it contacts.
- Do not charge the battery on a surface (such as kitchen counter tops) which could be damaged by the acid contained inside the battery. Take precautions to protect the surface on which you charge your battery.
- Use only a Power Wheels® Super 6™ Volt charger with an A-style connector (120 VAC, 60 Hz, 15W with an output of 6 VDC, 7.2W) to charge your 6 volt battery.
- If your battery is old and will not accept a charge, do not leave it in the vehicle. Always remove a dead battery from the vehicle.

Battery Charging

- Plug the charger and battery connectors together. Push firmly to make sure the two connectors are completely joined.

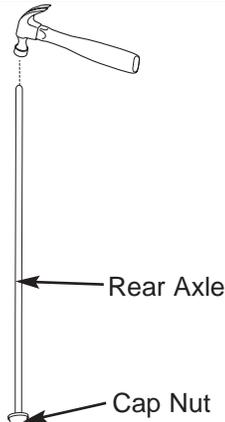

- Plug the charger into a standard 120 volt wall outlet.
Note: If power flow to the wall outlet is controlled by a switch, make sure the switch is "ON".
- **Before first time use, charge the battery for at least 18 hours.** Never charge the battery longer than 30 hours.
- **Recharge the battery for at least 14 hours** after each use of your vehicle. Do not charge the battery longer than 30 hours.
- Once the battery is charged, disconnect the charger connector from the battery connector. Unplug the charger from the wall outlet. The battery is now charged and is ready to be installed in your vehicle. Please see "Battery Installation" on page 17 for detailed battery installation instructions.

WARNING

Children can be harmed by small parts, sharp edges and sharp points in the vehicle's unassembled state, or by electrical items. Care should be taken in unpacking and assembly of the vehicle. Children should not handle parts, including the battery, or help in assembly of the vehicle.

1

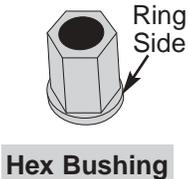

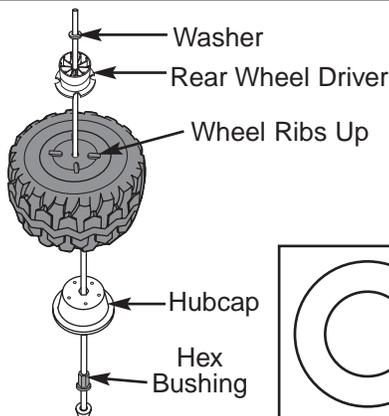

.437 Cap Nut

- Fit a cap nut onto one end of the rear axle.
- Tap the other end of the rear axle with a hammer to secure the cap nut on the end of the rear axle.

Note: You may want to position the cap nut on a scrap block of wood to protect the assembly surface.

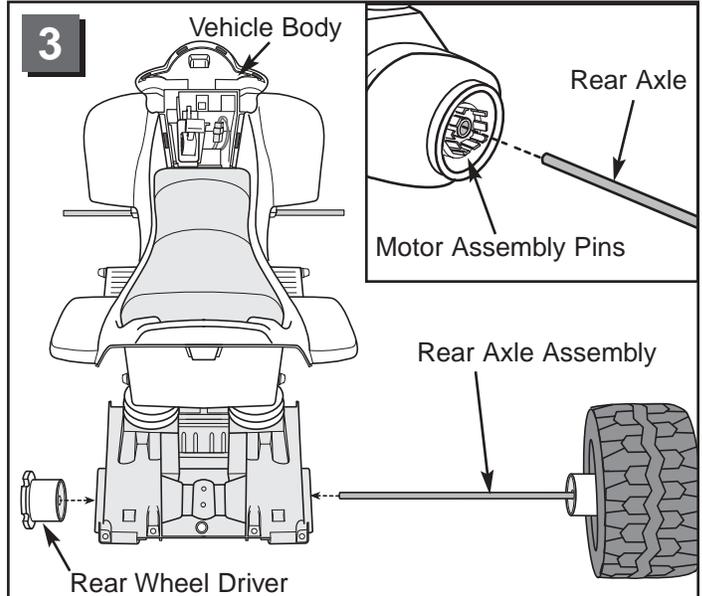

2

Hex Bushing

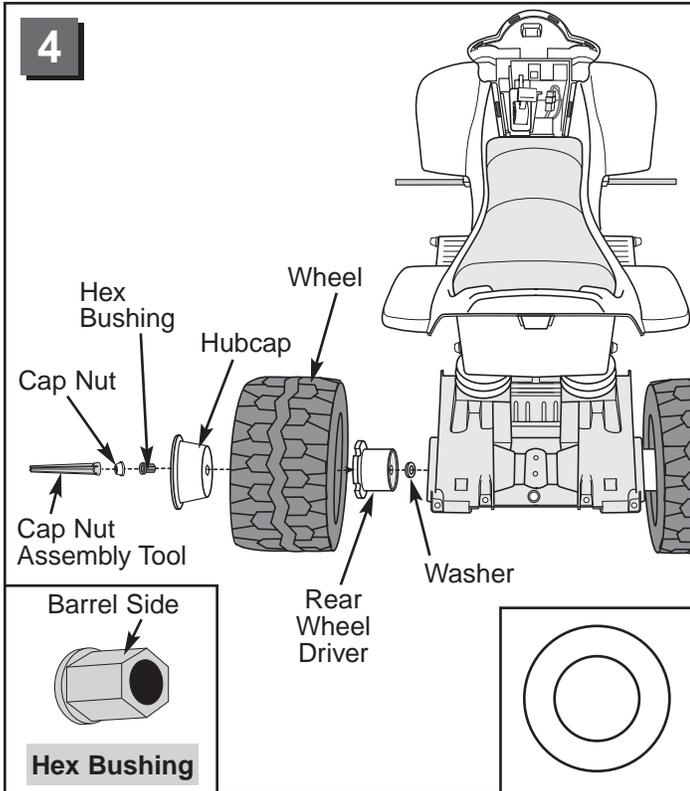

- Slide a hex bushing, ring side first, onto the rear axle.
- Slide a hubcap, ring side first, onto the rear axle.
- Slide a wheel onto the rear axle. Make sure the ribs on the wheel face **up**.
- Slide a rear wheel driver, ring side first, onto the rear axle. Fit the grooves on the rear wheel driver onto the ribs on the wheel.
- Slide a washer onto the rear axle.
- Set the rear axle assembly aside.

3

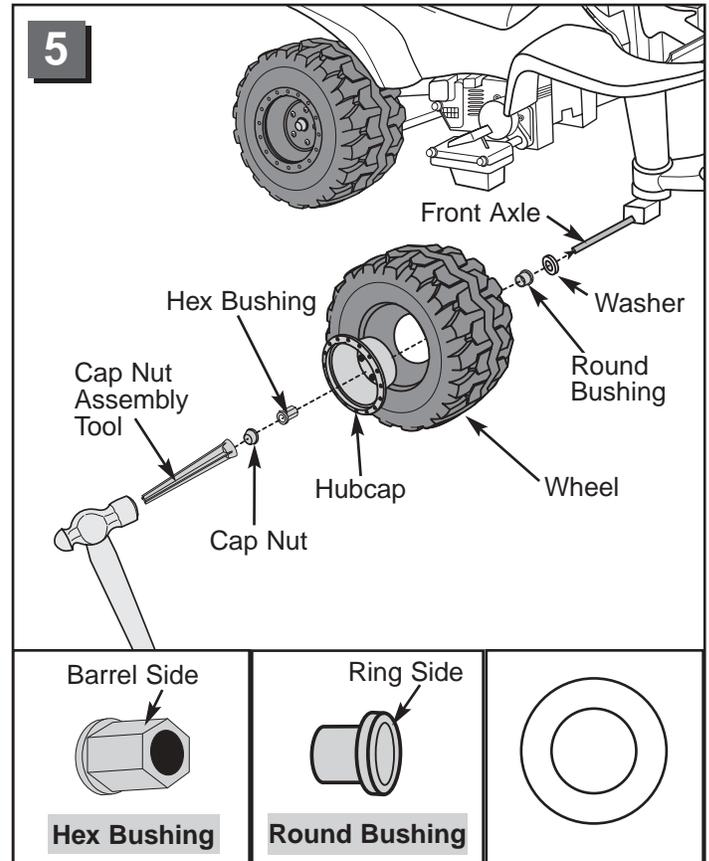

- Position the vehicle body upright.
- Fit and hold a rear wheel driver against the motor pins on one end of the motor assembly.
- While holding the rear wheel driver in place, slide the rear axle into the hole in the opposite side of the motor assembly. Make sure the rear wheel driver on the rear axle assembly fits onto the pins on the motor assembly.
- **Take the rear wheel driver off the open end of the rear axle. You will need to add a washer to the rear axle and then re-assemble the rear wheel driver in the next assembly step.**

Assembly

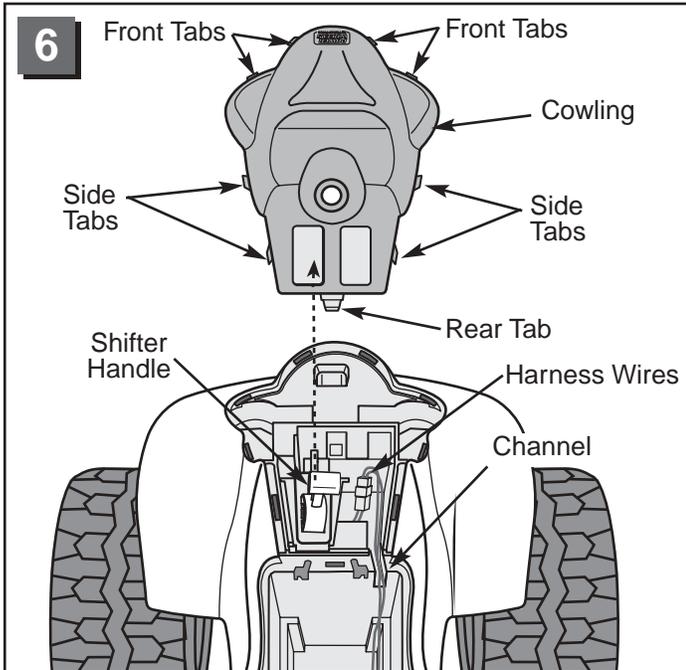

- Slide a washer onto the rear axle.
- Slide the rear wheel driver onto the rear axle. Make sure the rear wheel driver fits onto the pins on the motor assembly.
- Slide a wheel onto the rear axle. Make sure the ribs on the wheel fit into the grooves on the rear wheel driver.
- Slide a hubcap onto the rear axle.
- Slide a hex bushing, barrel side first, onto the rear axle. Press all but the ring on the hex bushing into the wheel.
- Fit a cap nut on the end of the rear axle.
- Fit the cupped end of the cap nut assembly tool over the cap nut and tap the end of the cap nut assembly tool with a hammer to secure the cap nut on the end of the rear axle.

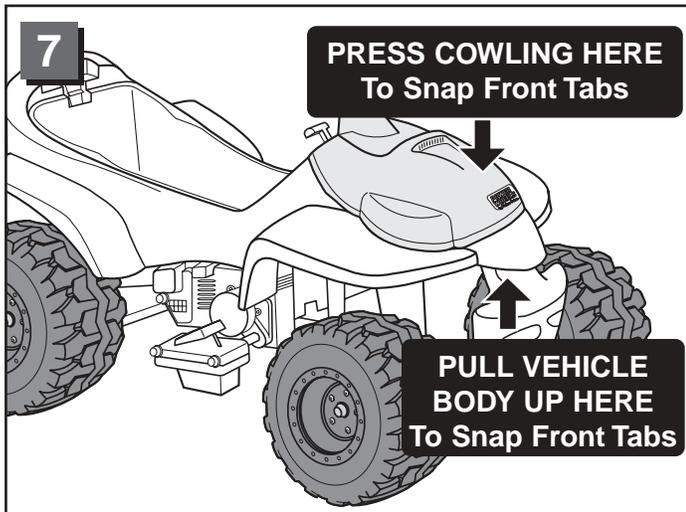

- Slide a washer onto one of the front axles.
- Slide a round bushing, ring side first, onto the same front axle.
- Slide a wheel onto the front axle.
- Slide a hubcap onto the front axle.
- Slide a hex bushing, barrel side first, onto the front axle.
- Fit a cap nut on the end of the front axle.
- Fit the cupped end of the cap nut assembly tool over the cap nut and tap the end of the cap nut assembly tool with a hammer to secure the cap nut on the end of the axle.
- Repeat this procedure to assemble the remaining front wheel (and a washer, round bushing, hubcap and capnut) to the other front axle.

Assembly

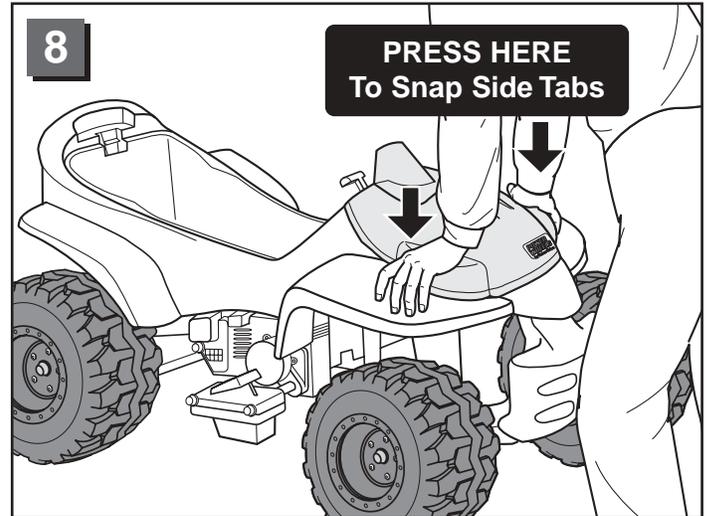

- Press the tab under the back of the seat and lift to remove the seat.
- Fit the rectangular opening in the cowling over the shifter handle.
- Align the front, side and rear tabs on the cowling with the slots in the vehicle body **but do not snap the tabs into the slots.**
- Make sure the harness wires are positioned in the vehicle body channel to prevent them from being pinched between the cowling and vehicle body.

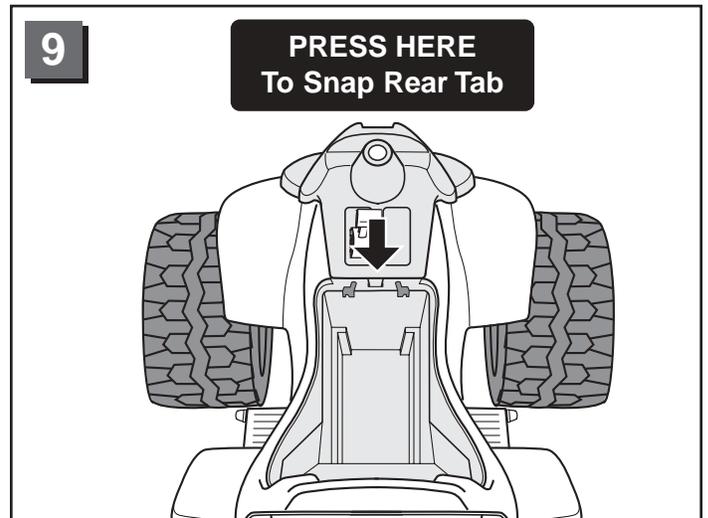

- Press firmly on the front of the cowling to snap the four front tabs into the slots in the vehicle body. **Make sure the side and rear tabs stay aligned with the slots.**

Note: Pull up on the front of the vehicle body while pressing down on the cowling to make sure the front tabs snap into the slots.

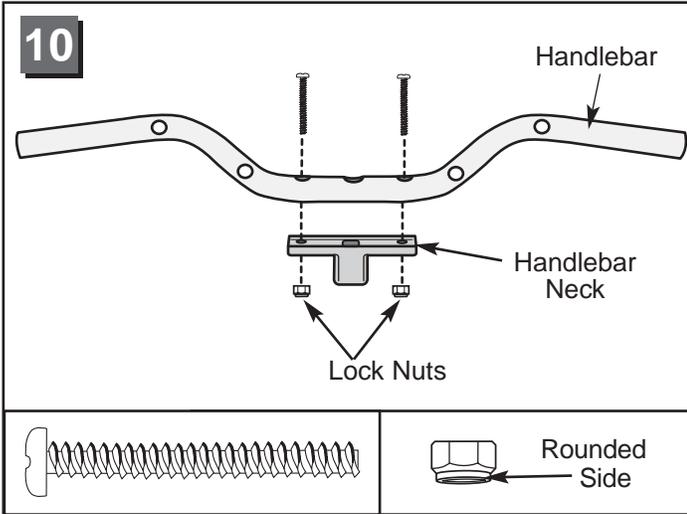

- Press firmly on each side of the cowling to snap the four side tabs into the slots in the vehicle body. **Make sure the rear tab stays aligned with the slots.**

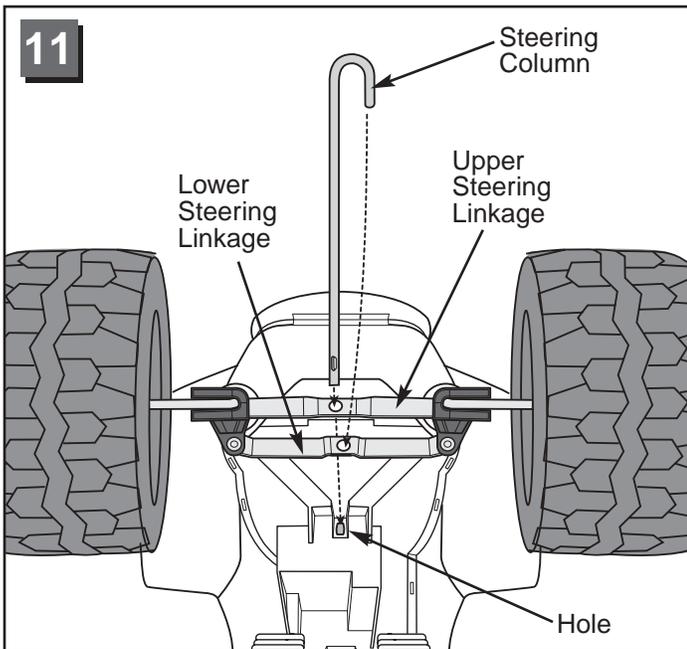

- Press firmly on the back of the cowling to snap the rear tab into the slots in the vehicle body.

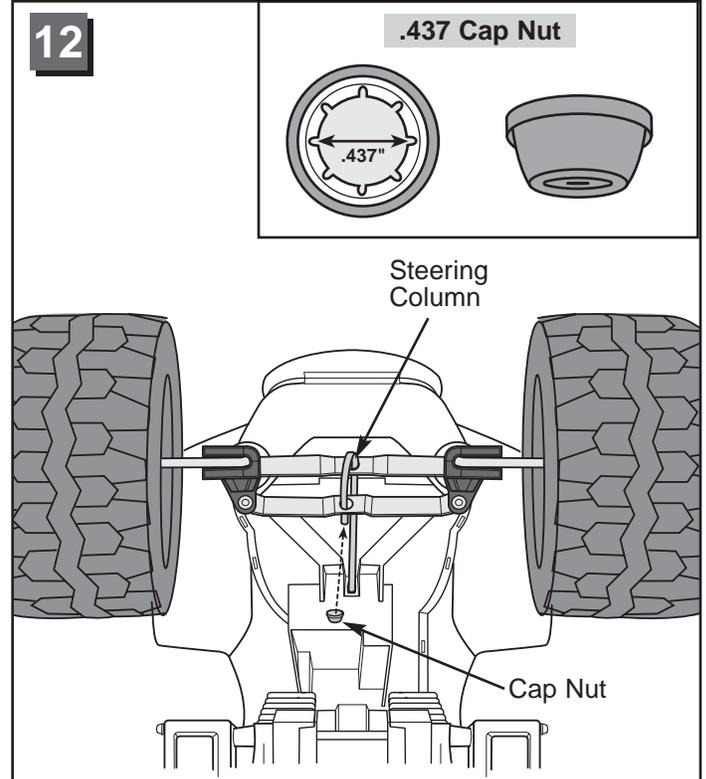

Assembly

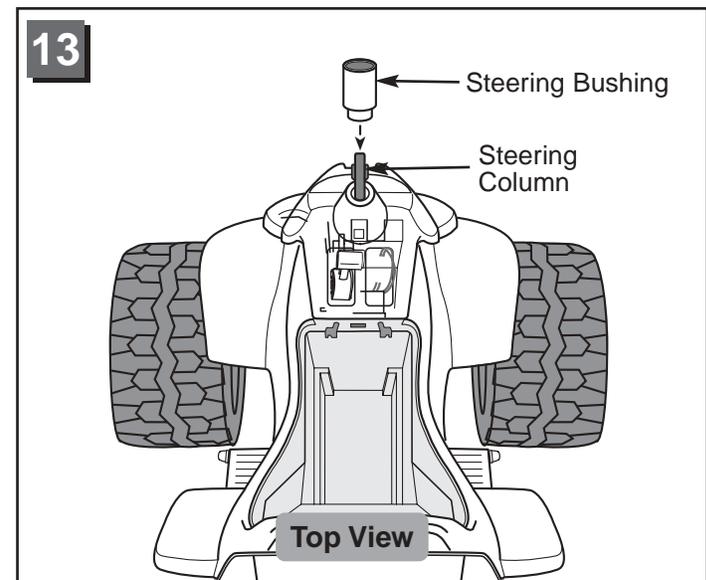

- Position the handlebar upright.
- Fit the handlebar neck to the underside of the handlebar, with the holes in the handlebar and handlebar neck aligned.
- Insert two #10 x 1⁵/₈" screws down through the handlebar and handlebar neck.
- Fit a #10 lock nut onto the ends of both screws. Make sure the rounded side of the lock nut is down.
- While holding a lock nut steady with pliers, tighten the screw with a Phillips screwdriver. Do not over-tighten. Repeat this procedure to tighten the other screw.
- Set the handlebar assembly aside for assembly step 14.

- Lift the front end of the vehicle.
- Slide the straight end of the steering column through the hole in the upper steering linkage and out through the hole in the vehicle body.
- Insert the curved end of the steering column into the hole in the lower steering linkage.

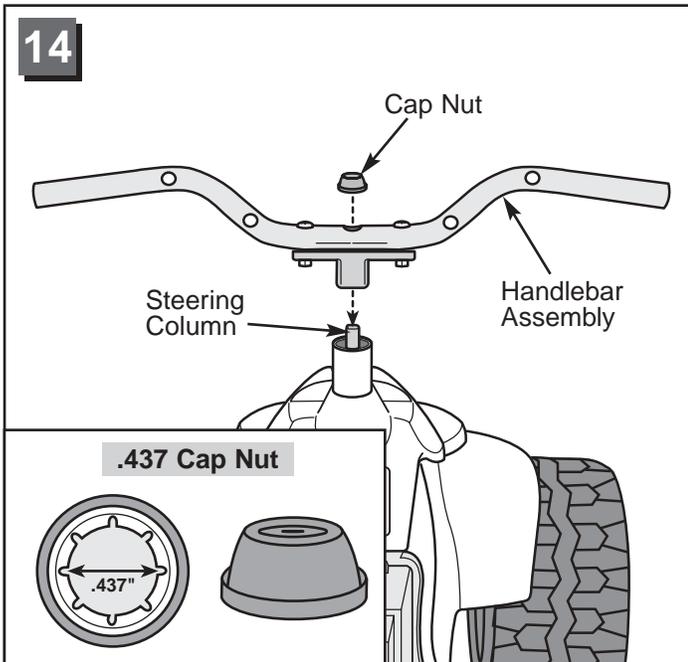

- Fit a cap nut on the curved end of the steering column.
- Support the steering column and tap the cap nut with a hammer to secure it on the end of the steering column.
- Position the vehicle body upright.

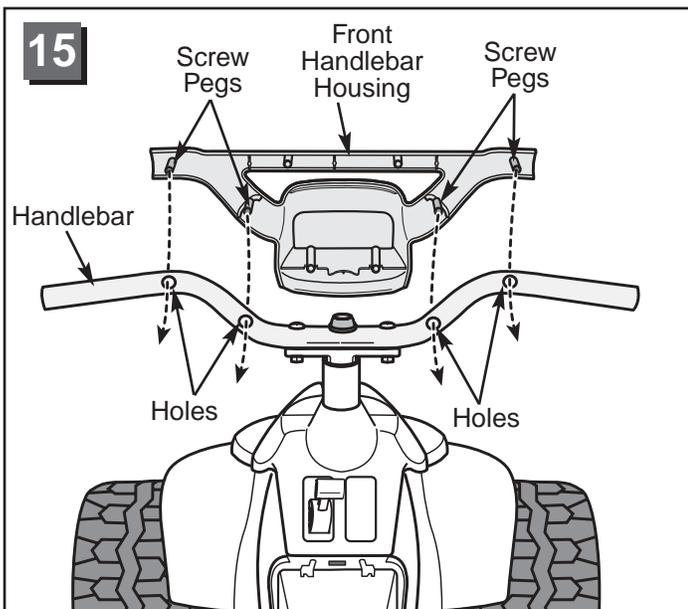

Hint: You may want the help of another adult to support the steering column near the steering linkage while assembling the handlebar to the vehicle body.

- Slide the steering bushing, narrow side down, onto the steering column and into the neck of the vehicle body.

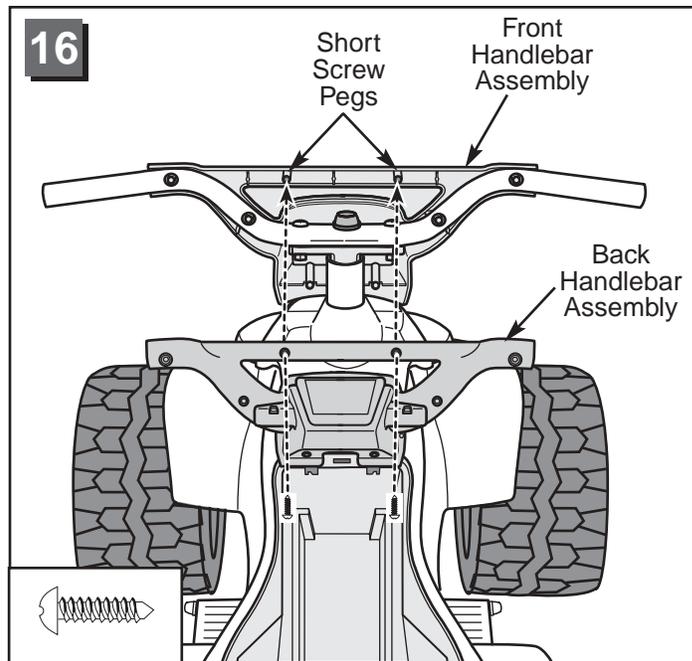

Assembly

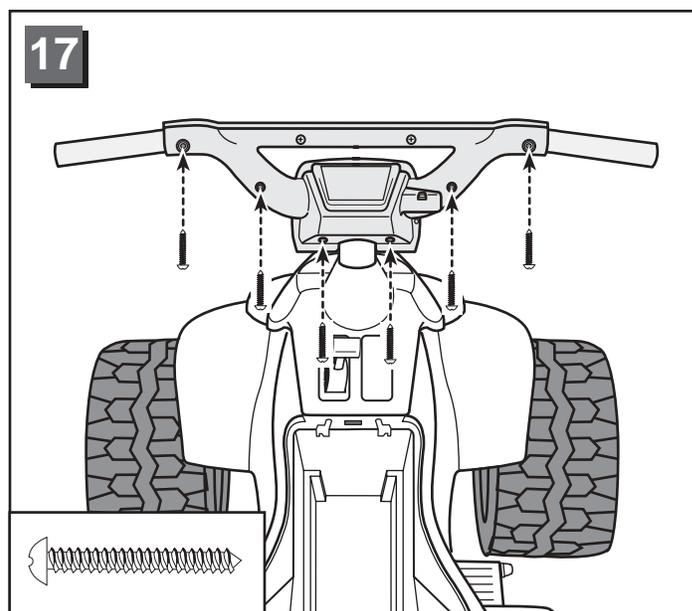

- Fit the handlebar assembly onto the end of the steering column. Make sure the handlebar grip area points towards the rear of the vehicle.
- Fit a cap nut on the end of the steering column.
- Tap the cap nut with a hammer to secure it on the end of the steering column.
- Pull up on the handlebar to make sure the handlebar assembly is secure.

- Fit the front handlebar assembly into the front of the handlebar.

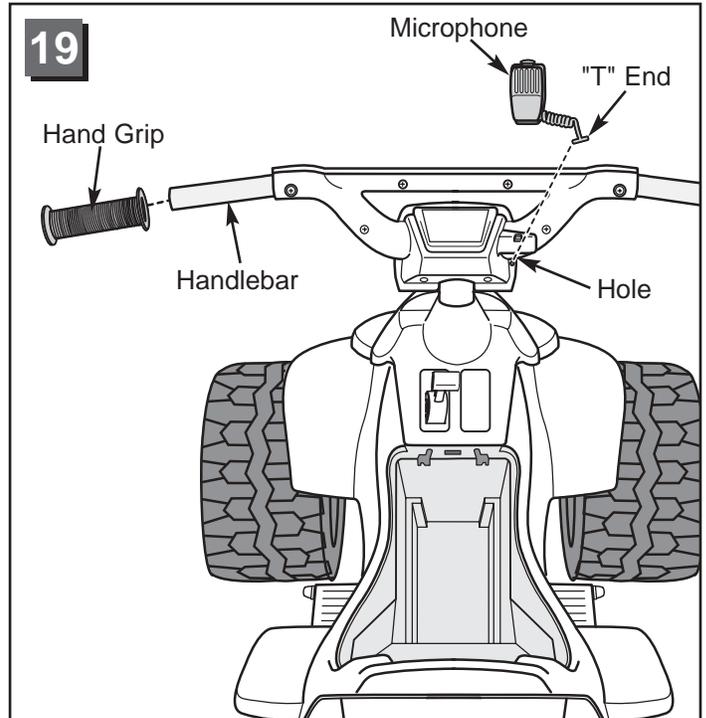

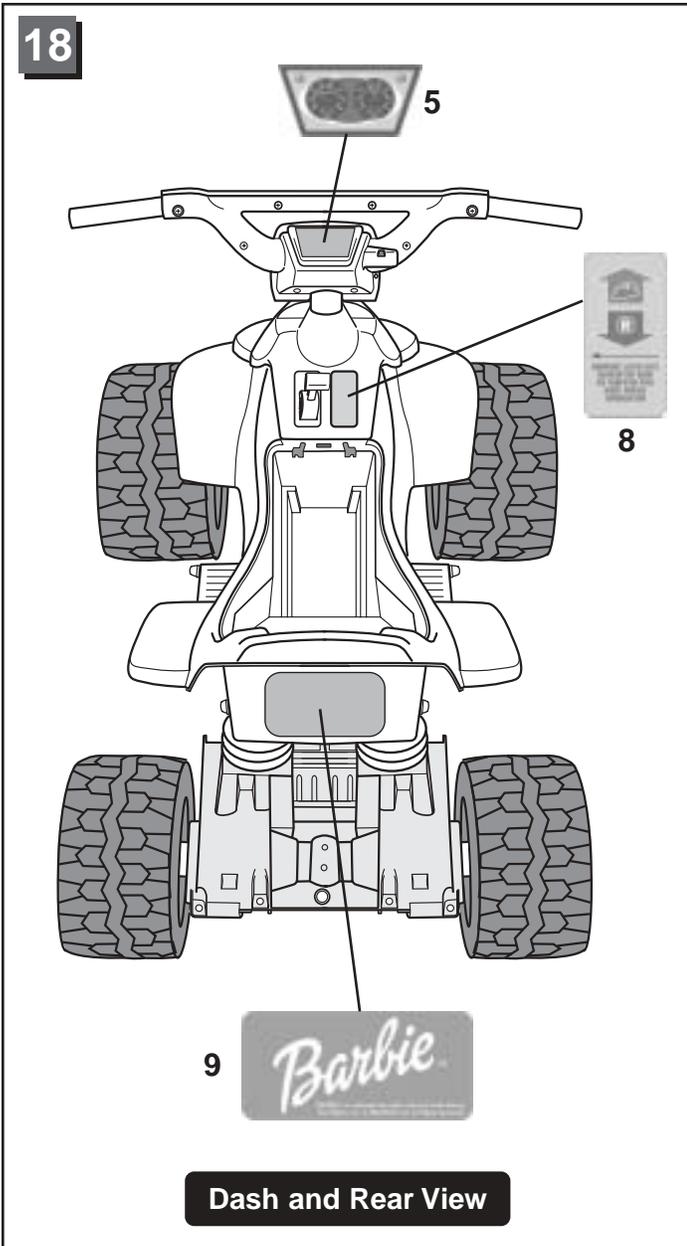

- Now, fit the back handlebar assembly to the front handlebar assembly.
- Insert two #6 x 1/2" screws into the two top center holes of the back handlebar assembly, as shown.
- Tighten the screws with a Phillips screwdriver. Do not over-tighten.

- Insert six #6 x 1" screws through the back handlebar assembly, as shown.
- Tighten the screws with a Phillips screwdriver. Do not over-tighten.

Assembly

- Bend the plastic tip at the end of the microphone cord so that it forms a "T".
- Insert the "T" end of the microphone cord into the hole in the handlebar. Pull gently on the microphone cord to make sure it is secure in the handlebar.
- Hang the microphone on the handlebar.
- Fit a hand grip onto each end of the handlebar. If it is difficult to slide the hand grips onto the handlebar, moisten the hand grips with warm water first.

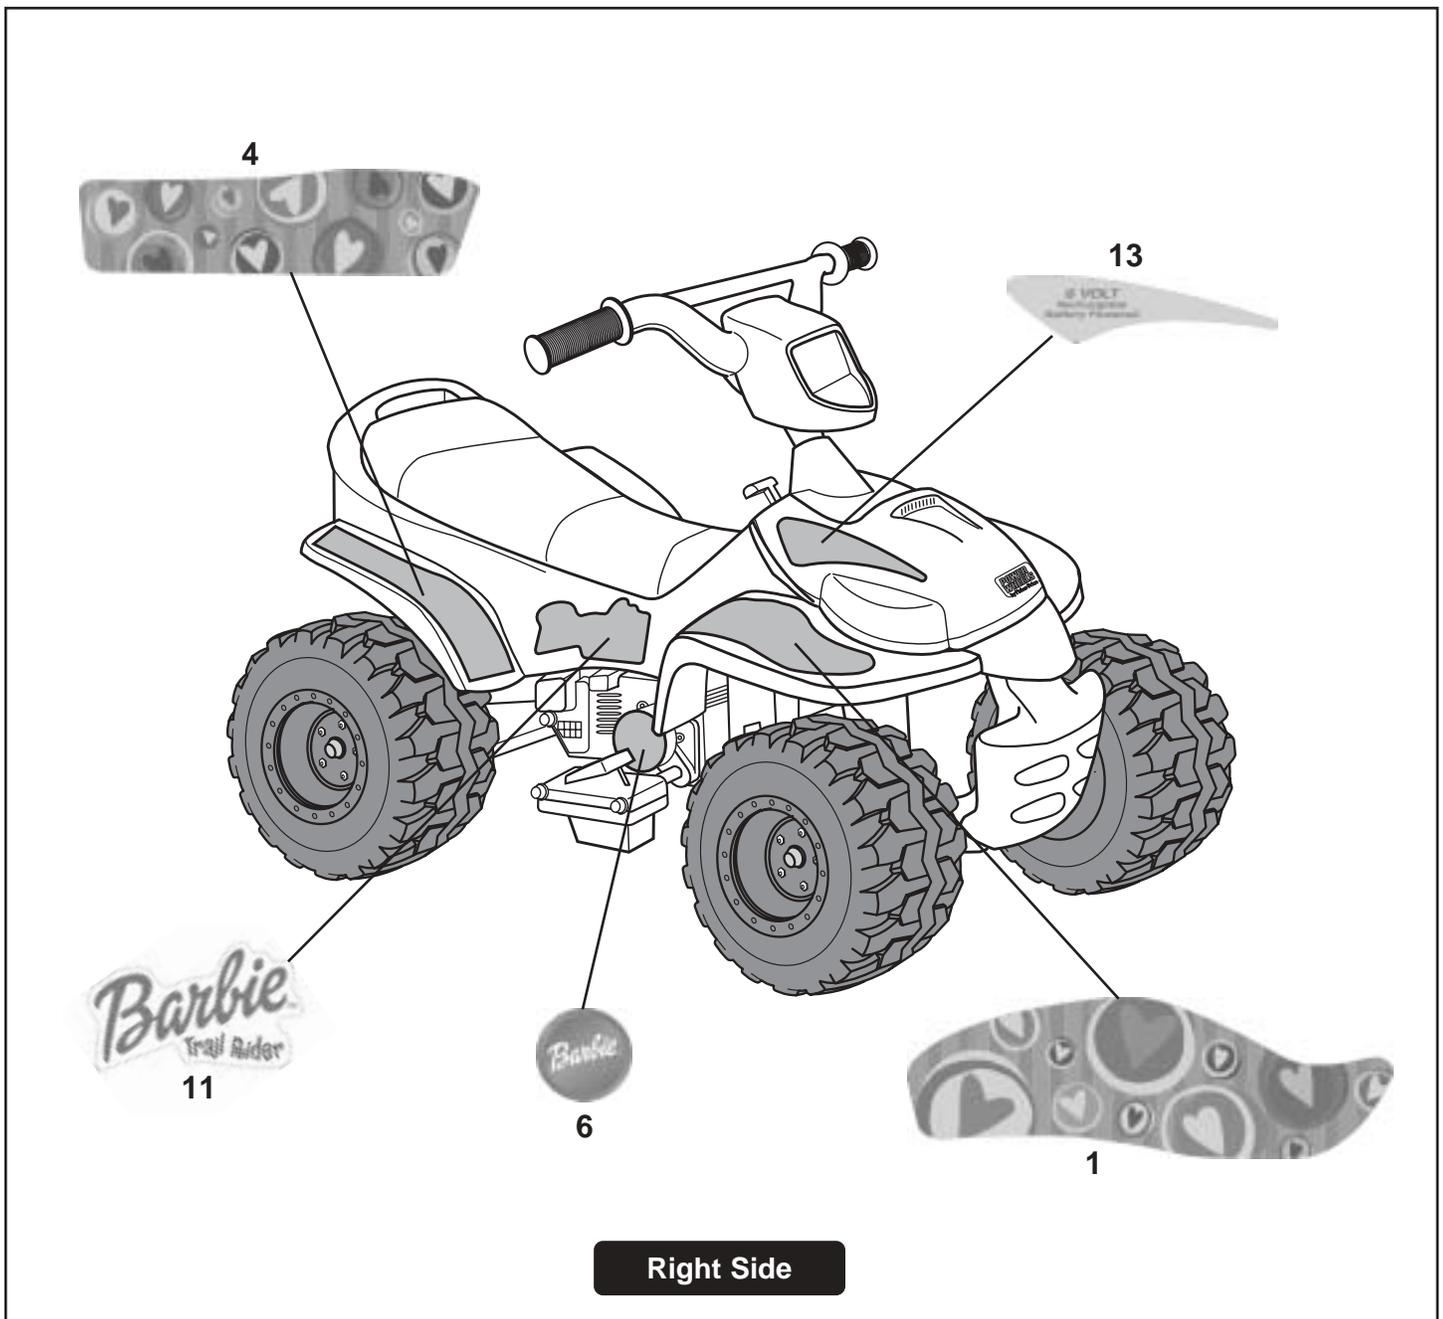

- Apply labels as shown. For best results, make sure your hands and the areas to which the labels will be applied are clean and dry.

G

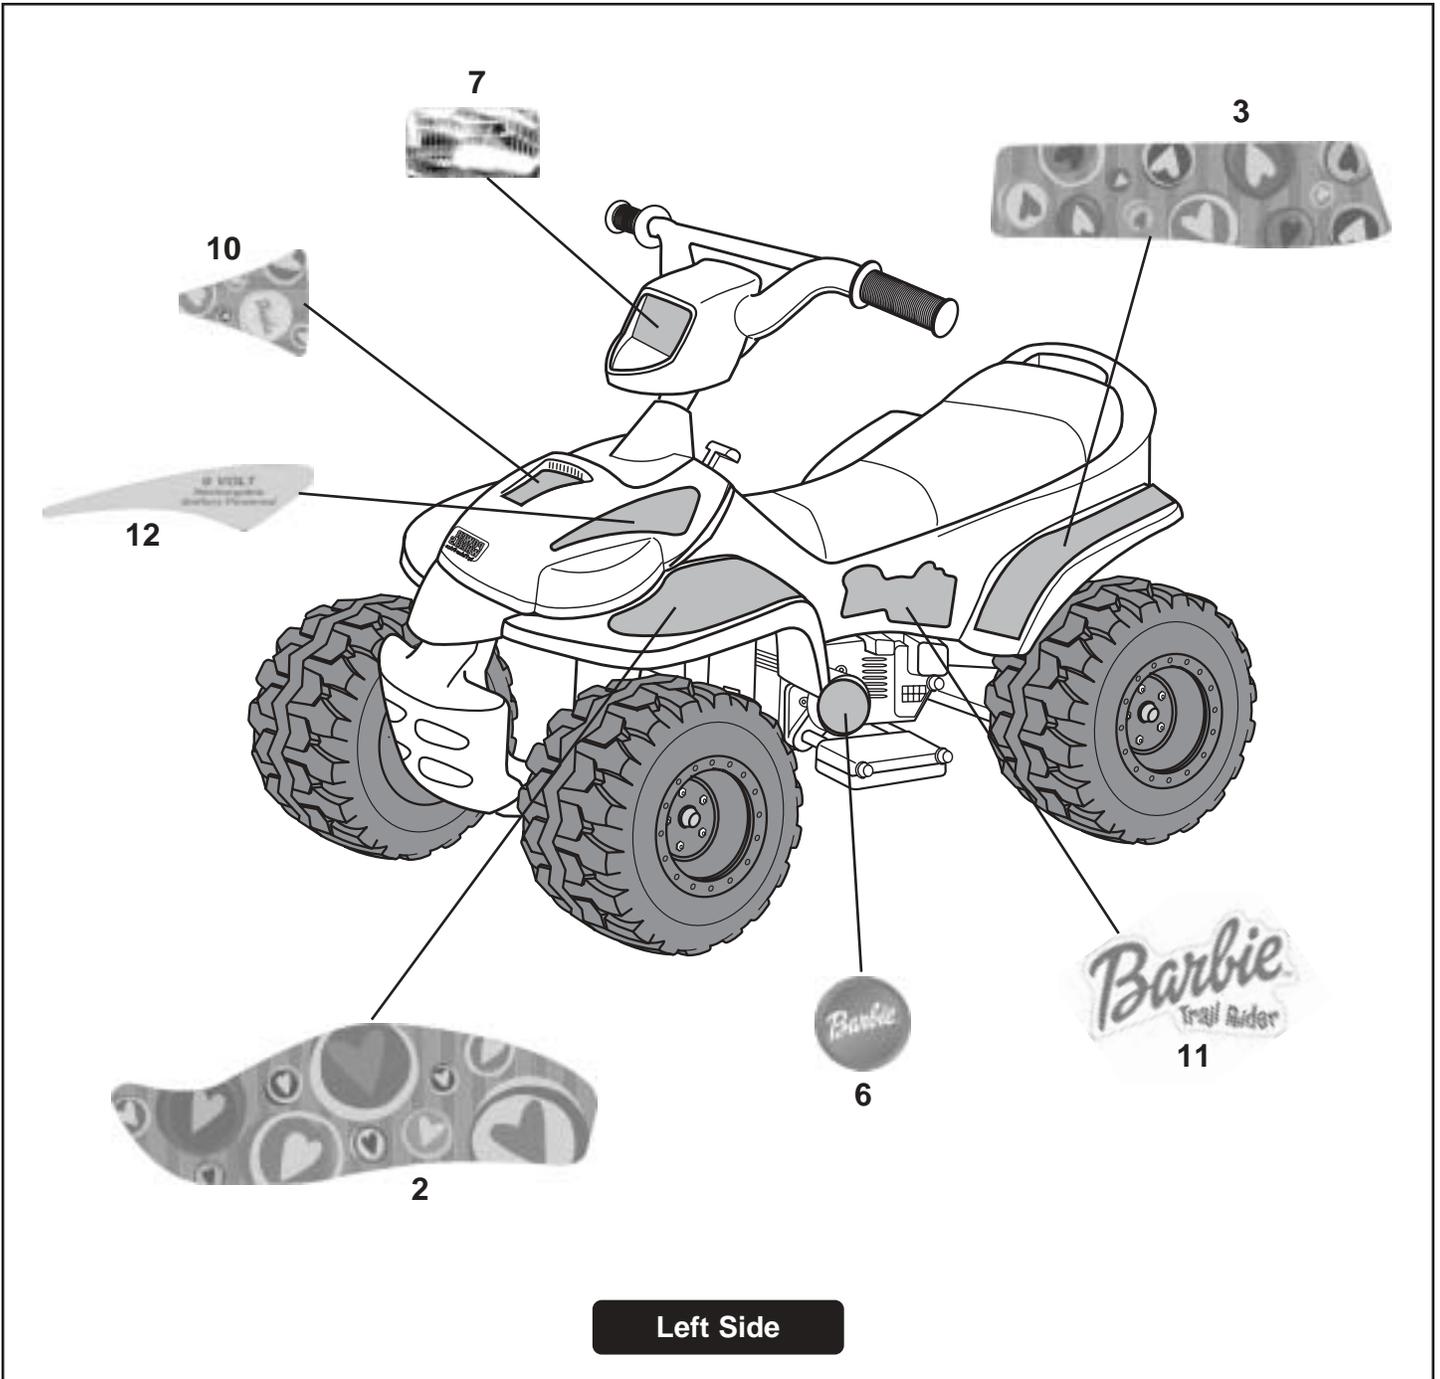

Label Decoration

Proper label application will help to keep the labels looking their best! When applying labels, keep the following guidelines in mind:

- Wash your hands before applying the labels.
- Before applying the labels, wipe the surface of the vehicle with a clean, dry cloth to remove any dust or oils.
- Place the labels exactly as shown in the illustrations.
- For best results, avoid repositioning a label once it has been applied to the vehicle.
- **After applying a label, rub the label firmly with a clean, dry cloth to make sure the label is adhered to your vehicle. Start at the center of a label, and smooth towards the outer edges to remove air bubbles.**

Label Decoration

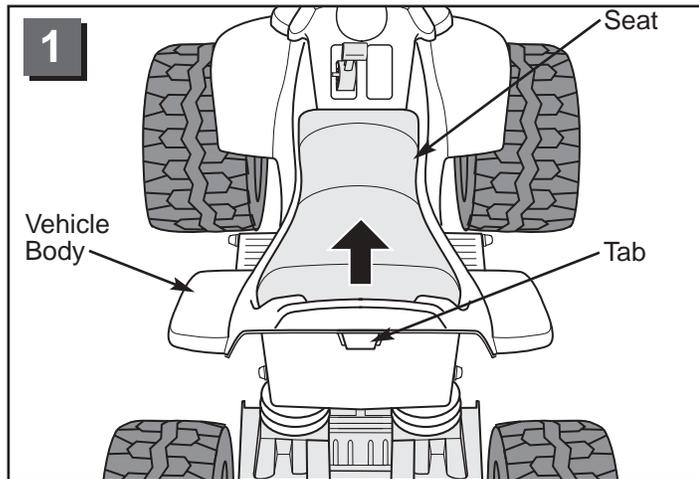

H

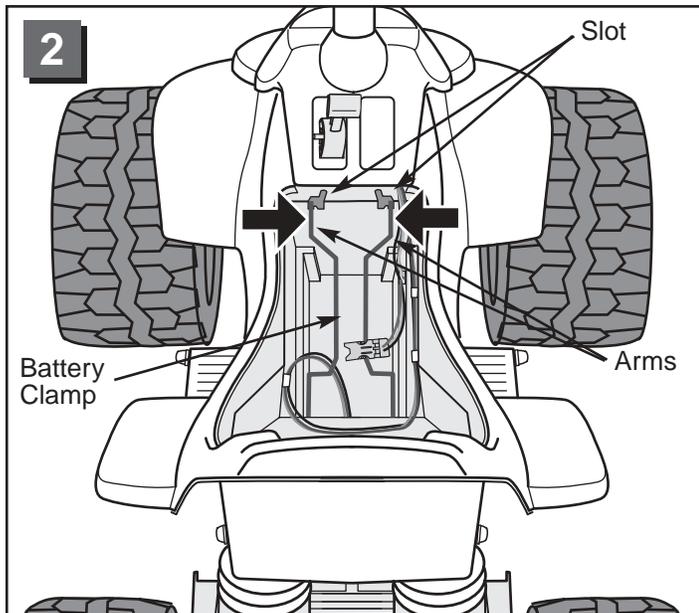

Battery Installation

IMPORTANT! Use only a Power Wheels® 6 volt battery with A-style connector and built-in thermal fuse. Use of any other battery can damage your vehicle. Make sure that you charge the battery for at least 18 hours using the enclosed Power Wheels® Super 6™ volt charger **before operating your vehicle for the first time**. Charge the battery for at least 14 hours after each use of the vehicle. Never charge the battery longer than 30 hours. Failure to follow these instructions may damage your battery and will void your warranty.

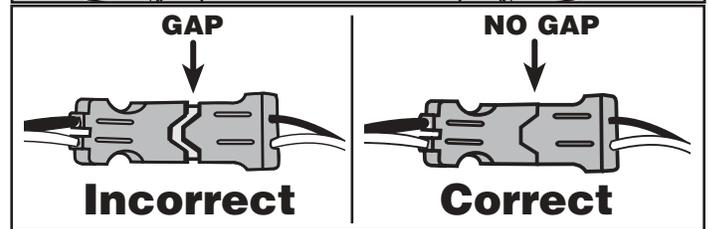

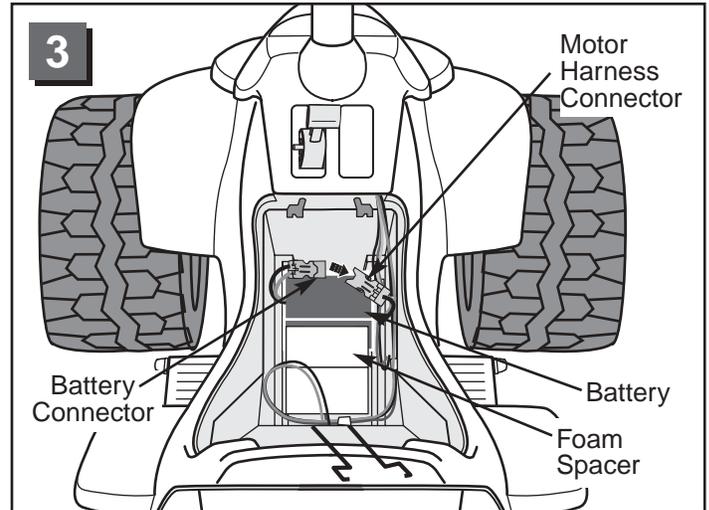

Do not discard the foam spacer that was packaged with the battery!

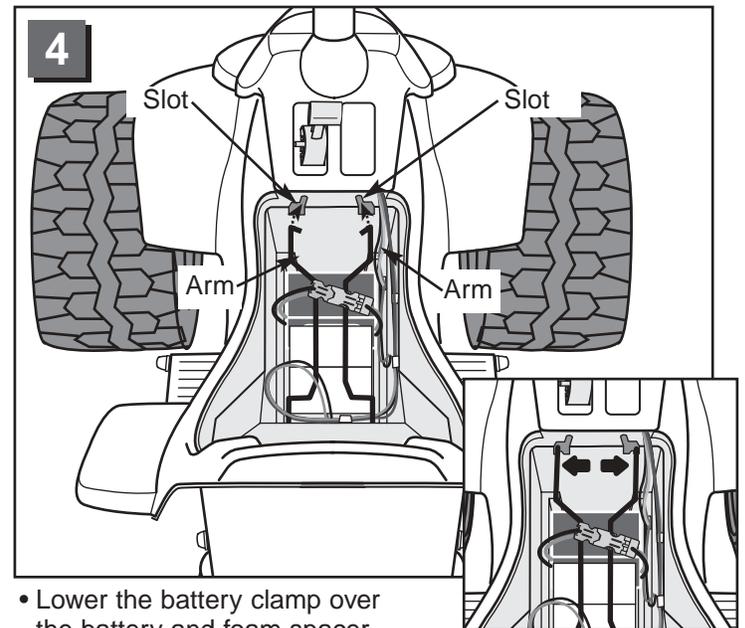

- Press the tab under the back of the seat and lift to remove the seat.

- Squeeze the battery clamp arms together to release the arms from the slots in the vehicle body.
- Press the battery clamp arms in and over the lock tabs and lift the battery clamp.

- Place the battery upright in the battery compartment.
- Place the foam spacer in the battery compartment, behind the battery.
- Plug the battery connector and motor harness connector together. Push firmly to make sure the two connectors are completely joined.

- Lower the battery clamp over the battery and foam spacer.
- Fit the battery clamp arms down into the slots in the vehicle body.
- Press the battery clamp arms out over the lock tabs to snap and secure the battery clamp arms in the slots.
- Replace the vehicle seat.

I

Battery Care and Disposal

Care

If a battery leak develops, avoid contact with the leaking acid and place the damaged battery in a plastic bag. See information below for proper disposal.

If acid comes in contact with skin or eyes, flush with cool water for at least 15 minutes and call a physician.

If acid is internally ingested, give water, milk of magnesia or egg whites immediately. Never give emetics or induce vomiting. Call a physician.

- Charge a new battery for at least 18 hours before first use. Never charge the battery longer than 30 hours. Overcharging or undercharging the battery may shorten battery life and decrease vehicle running time.
- After the first charge, recharge the battery for at least 14 hours after each use. Never charge the battery longer than 30 hours. Charge the battery after each use, regardless of how long the vehicle was used.
- The battery must be upright while charging.
- Do not allow the battery to run down completely before charging.
- Charge the battery before storing the vehicle.
- Charge the battery at least once per month, even if the vehicle has not been used.
- Leaving the battery in a discharged condition will ruin it.
- Always remove an exhausted battery from the vehicle. Battery leakage and corrosion can damage the vehicle.
- Do not store the battery on a surface (such as kitchen countertops) which could be damaged by the acid contained inside the battery. Take precautions to protect the surface on which you store the battery.
- Do not store the battery in temperatures above 75° F or below -10° F.
- Use only a Power Wheels® 6 volt battery. Remember to charge the new battery for at least 18 hours before first use.
- Prevent the battery from moving freely inside the battery compartment. Always use the battery clamp to secure the battery in the battery compartment.
- Examine the battery, charger and their connectors for excessive wear or damage each time you charge the battery. If damage is detected, do not use the charger or the battery until you have replaced the worn or damaged part.

Battery Care and Disposal

Disposal

- Your Power Wheels® battery is a sealed lead-acid battery. It must be recycled or disposed of in an environmentally sound manner.
- Do not dispose of a lead-acid battery in a fire. The battery may explode or leak.
- Do not dispose of a lead-acid battery in your regular, household trash. The incineration, landfilling or mixing of sealed lead-acid batteries with household trash is prohibited by law in most areas.
- Return exhausted batteries to federal or state approved lead-acid battery recycler, such as a Power Wheels® authorized service center or a local seller of automotive batteries. For the authorized service center location nearest to you, please call **1-800-348-0751**. Contact your local waste management officials for other information regarding the environmentally sound collection, recycling and disposal of lead-acid batteries. If you live in the State of Florida or the State of Minnesota, it is prohibited by law for anyone to throw away lead-acid batteries in the municipal waste stream.

J

Caring For Your Vehicle

- Check all screws, cap nuts and their protective coverings regularly and tighten as required. Check plastic parts on a regular basis for cracks or broken pieces.
- During snowy or rainy weather, the vehicle should be stored inside or under a protective cover. Remember to charge the battery at least once per month while your vehicle is not in regular use.
- Avoid operating the vehicle in wet or snowy conditions, and do not spray the vehicle with a hose. Do not wash the vehicle with soap and water. Water or moisture in the motors or electrical switches can cause them to corrode, and could cause switch or motor failure.
- Avoid operating the vehicle on sand, loose dirt or gravel. Sand, loose dirt or gravel in the motors or electrical switches can cause them to jam, and could cause switch or motor failure.
- The vehicle can be wiped down with a soft, dry cloth. For a shiny finish, you can wipe plastic parts with a non-wax furniture polish applied to a soft-cloth. Do not use automotive wax. Do not use soap and water or spray the vehicle with a hose.
- To ensure that your vehicle stays in good operating order, we recommend that you periodically have your vehicle checked by a Power Wheels® authorized service center. See page 24 for the list of authorized service centers or call **1-800-348-0751** for the location of the authorized service center nearest you.

RIDING HAZARD

WARNING

Prevent Injuries and Deaths

- Direct Adult Supervision Required.
- Keep Children Within Safe Riding Areas

These areas must be:

- away from swimming pools and other bodies of water to prevent drownings.
- generally level to prevent tipovers.
- away from steps, driveways, cars, roads and alleys.

Teach Safety Rules to Children

While children can quickly develop the skill necessary to drive this vehicle, it is important to remember that their judgment skills are still very immature. Unsupervised driving by children can lead to serious injury. Before children use this vehicle, an adult should carefully evaluate the driving area as well as the children's skill level and ability to drive this vehicle safely. Children are not always able to recognize or anticipate hazards, even when they have been taught about them. **THERE IS NO ACCEPTABLE SUBSTITUTE FOR DIRECT ADULT SUPERVISION.**

Teach appropriate safety rules to your child before allowing operation of this vehicle. These rules should also be reviewed with neighborhood children or other playmates who want to drive this vehicle.

Riding Rules

Make sure children know and follow these rules for safe driving:

1. Always sit on the seat.
2. Always wear shoes.
3. Only 1 (one) rider at a time. A child who is not sitting on the seat or who is standing on the vehicle could fall off, cause a tip-over or block the driver's view. A child could be seriously injured.
4. Do not allow any child to drive the vehicle in the street or near moving (motorized) vehicles.
5. Do not allow any child to drive near bodies of water (such as pools or creeks), obstructions (such as furniture, low tree limbs or play equipment), or drop-offs (such as stairs or decks).
6. Do not allow any child to drive the vehicle in the dark. A child could encounter unexpected obstacles and have an accident. Operate the vehicle only in the daytime or a well-lit area.

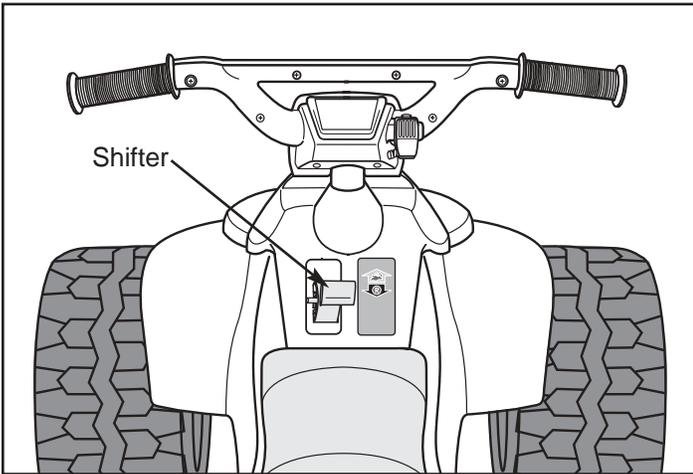

7. Do not allow your child to drive on sloped or inclined surfaces. **Restrict your child's driving to generally level ground ONLY!**
8. Do not allow your child to drive down or across a steep slope.
 - The vehicle may gain unsafe speed, even if the pedal is released to stop.
 - The vehicle may tilt and tip over.
 - The wheels could lose traction, causing the vehicle to slip.
9. Do not allow your child to drive up steep inclines. The motor may stop and the vehicle could roll backwards at an unsafe speed.
10. Never put anything near any moving parts. Rotating parts such as motors, gear boxes and wheels can snag fingers, hair, etc., causing serious injury. Do not allow operation of the vehicle when it is on its side or in an upside-down position.
11. Do not operate the vehicle near flammable vapors (gasoline, paint thinner, acetone, liquid wax, etc.). The vehicle's electrical switches, like most electrical switches, emit an internal spark when first turned on or turned off. The presence of flammable liquids or vapors could cause an explosion or a fire. Keep all flammable products in tightly sealed containers and away from the vehicle.
12. Do not allow a child to operate the vehicle without direct adult supervision. To prevent unsupervised use of the vehicle, disconnect the motor harness from the battery when the vehicle is not in use.

L

How to Operate Your Vehicle

IMPORTANT! use the vehicle **ONLY** outdoors. Most interior flooring can be damaged by riding this vehicle indoors. Fisher Price® will not be responsible for damage to the floor if the vehicle is used indoors.

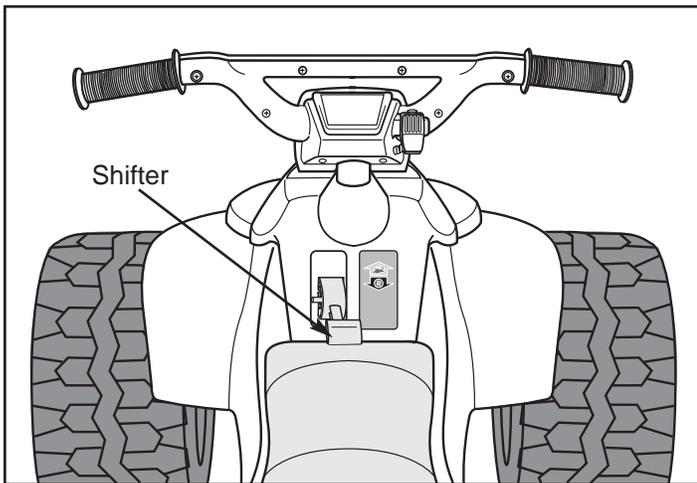

FORWARD

- Make sure the shifter is in the DRIVE position .
- Press the foot pedal. The vehicle drives forward at a maximum of 3½ mph.
- Help your child practice steering to learn how far and how quickly to turn the handlebar when driving forward.

REVERSE

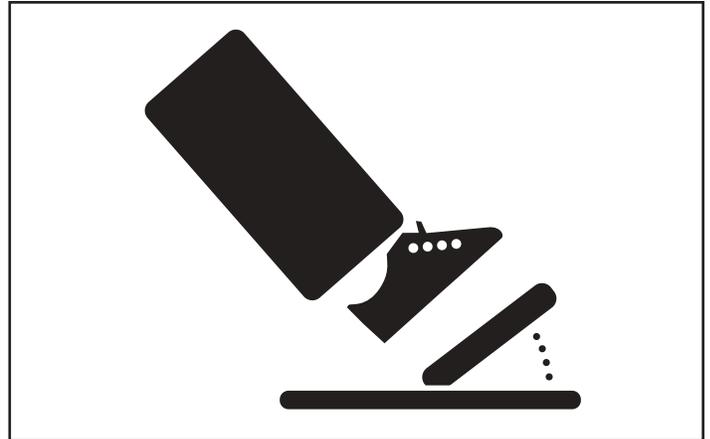

IMPORTANT! To avoid damaging the motors and gears, make sure to stop the vehicle before switching from drive to reverse.

- Move the shifter to the REVERSE position .
- Press the foot pedal. The vehicle drives in reverse at a maximum of 3½ mph.
- Help your child practice steering to learn how far and how quickly to turn the handlebar when driving in reverse.

How to Operate Your Vehicle

TO STOP

- Your vehicle has a patented, electronic braking system that automatically stops the vehicle when your child's foot is lifted from the pedal.
- Make sure your child is comfortable with steering the vehicle and automatically knows how to stop.

M

FCC Statement (United States Only)

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE: Changes or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.

N

Problems and Solutions Guide

IMPORTANT! If you experience a problem with your vehicle, first check the Problems and Solutions Guide below. If you still experience a problem, please contact Power Wheels® Consumer Relations, toll-free at **1-800-348-0751** between 8 AM and 6 PM (EST) Monday through Friday. Or, contact your local Power Wheels® authorized service center. For the location nearest you, please refer to the Authorized Service Center list beginning on page 24.

Problem	Possible Cause	Solution
Vehicle does not run	Undercharged battery	Charge the battery. A new battery should have been charged for at least 18 hours before using the vehicle for the first time. After first-time use, recharge the battery for at least 14 hours after each use. Never charge the battery longer than 30 hours.
		Check all connectors. Make sure the battery connector is tightly plugged into the charger connector, and that the charger is plugged into the wall.
		Make sure power flow to the wall outlet is "ON".
	Charger is not working	There is no sure way to tell if your charger is working unless you have a volt meter. If you suspect there is a problem with your charger, contact your local Power Wheels® authorized service center. They can test your charger for you.
	Tripped thermal fuse	The built-in thermal fuse in the battery may "trip" and shut down operation of the vehicle if the vehicle is overloaded or the driving conditions too severe. The fuse will automatically reset itself after approximately 25 seconds, allowing the vehicle to resume normal operation. To avoid repeated automatic shutdowns, do not overload the vehicle by exceeding the 65 lb. maximum weight capacity or by towing anything behind the vehicle. Do not drive up hills or run into fixed objects, which can cause the wheels to stop spinning while power is still being supplied to the motors. If a thermal fuse continually trips, contact your local Power Wheels® authorized service center.
	Loose wire or loose connectors	Check all wires and connectors. Make sure the battery connector is tightly plugged into the motor harness connector, and that there are no loose wires around the motors.
	Dead battery	If your battery is old or if you have not followed Battery Care instructions, your battery may be dead. If you are unsure whether or not the battery is dead, you can have it tested at your local Power Wheels® authorized service center.
	Electrical switch damage	The electrical switches can become corroded due to exposure to water or moisture, or can jam due to loose dirt, sand or gravel. Contact your local Power Wheels® authorized service center for diagnosis and repair.
Motor damage	Contact your local Power Wheels® authorized service center for diagnosis and repair.	

Problems and Solutions Guide

Problem	Possible Cause	Solution
Vehicle was running but suddenly stopped	Loose wire or loose connectors	Check all wires and connectors. Make sure the battery connector is tightly plugged into the motor harness connector, and that there are no loose wires around the motors.
	Tripped thermal fuse	The built-in thermal fuse in the battery may "trip" and shut down operation of the vehicle if the vehicle is overloaded or the driving conditions too severe. The fuse will automatically reset itself after approximately 25 seconds, allowing the vehicle to resume normal operation. To avoid repeated automatic shutdowns, do not overload the vehicle by exceeding the 65 lb. maximum weight capacity or by towing anything behind the vehicle. Do not drive up hills or run into fixed objects, which can cause the wheels to stop spinning while power is still being supplied to the motors. If a thermal fuse continually trips, contact your local Power Wheels® authorized service center.
Short run time (Less than 1 - 3 hours per charge)	Undercharged battery	Charge the battery. A new battery should have been charged for at least 18 hours before using the vehicle for the first time. After first-time use, recharge the battery for at least 14 hours after each use. Never charge the battery longer than 30 hours.
		Check all wires and connectors. Make sure the battery connector is tightly plugged into the charger connector, and that the charger is plugged into the wall.
		Make sure power flow to the wall outlet is "ON".
	Overcharged battery	Do not charge the battery longer than 30 hours. If you suspect that your battery is damaged as a result of overcharging, contact your local Power Wheels® authorized service center. They can test your battery for you.
	Battery is old and will not accept full charge	Even with proper care, a rechargeable battery does not last forever. Average battery life is 1 to 3 years depending on vehicle use and use conditions. Do not substitute parts.
	Tripped thermal fuse	The built-in thermal fuse in the battery may "trip" and shut down operation of the vehicle if the vehicle is overloaded or the driving conditions too severe. The fuse will automatically reset itself after approximately 25 seconds, allowing the vehicle to resume normal operation. To avoid repeated automatic shutdowns, do not overload the vehicle by exceeding the 65 lb. maximum weight capacity or by towing anything behind the vehicle. Do not drive up hills or run into fixed objects, which can cause the wheels to stop spinning while power is still being supplied to the motors. If a thermal fuse continually trips, contact your local Power Wheels® authorized service center.

Problems and Solutions Guide

Problem	Possible Cause	Solution
Vehicle runs sluggishly	Undercharged battery longer than 30 hours.	Charge the battery. A new battery should have been charged for at least 18 hours before using the vehicle for the first time. After first-time use, recharge the battery for at least 14 hours after each use. Never charge the battery
		Check all connectors. Make sure the battery connector is tightly plugged into the charger connector, and that the charger is plugged into the wall.
		Make sure power flow to the wall outlet is "ON".
	Battery needs charging	Be sure to charge the battery after each use.
	Battery is old and will not accept full charge	Even with proper care, a rechargeable battery does not last forever. Average battery life is 1 to 3 years depending on the vehicle use and use conditions. Replace the battery with a Power Wheels® 6 volt battery. Do not substitute parts.
	Vehicle is overloaded	Make sure you do not overload the vehicle by allowing more than one rider at one time, by exceeding the 65 lb. maximum weight capacity, or by towing objects behind the vehicle. If the vehicle is overloaded, the built-in thermal fuse in the battery may "trip" and automatically shut down operation of the vehicle for approximately 25 seconds. Reduce the load on the vehicle to prevent repeated automatic shutdowns.
	Driving conditions are too stressful	Use only on generally level ground.
Sometimes the vehicle doesn't run, but other times it does	Loose wire or connector	Check all wires around the motors and all connectors to make sure they are tight.
	Motor or electrical switch damage	Contact your local Power Wheels® authorized service center for diagnosis and repair.
When the foot pedal is pressed, the vehicle won't run without a push	Loose wire or connector	Check all wires around the motors and all connectors to make sure they are tight.
	"Dead Spot" on motor	Contact your local Power Wheels® authorized service center for diagnosis and repair.
Thermal fuse constantly "trips", but the vehicle is not overloaded nor the driving conditions too severe	Child is switching between DRIVE and REVERSE without stopping	Teach your child to stop the vehicle before switching direction.
Loud clacking or grinding noise from a motor-gearbox	Broken gears	Contact your local Power Wheels® authorized service center for diagnosis and repair.
Charger gets warm during use	It is normal for some chargers to get warm during use and is not reason for concern. Some chargers do not get warm during use.	No action required.
		If your charger does not get warm during use, it does not mean that it is not working properly.
Battery makes a sizzling or gurgling noise when charging	It is normal for some batteries to make noise and swell slightly while charging and is not reason for concern. Some batteries do not make noise or swell while charging.	No action required.
		If your battery does not make noise or swell slightly during charging, it does not mean that it is not accepting the charge.

If, after reviewing the Problems and Solutions Guide, the vehicle still fails to operate, please contact your nearest authorized service center (see page 24) or contact Power Wheels® Consumer Relations toll-free at **1-800-348-0751**.

Hint: For faster service when calling Consumer Relations, completely charge the battery before calling and have the following available by the phone:

- vehicle,
- vehicle model number (see sticker in battery compartment),
- vehicle production run number (see sticker in battery compartment),
- Phillips screwdriver, slotted screwdriver and needle-nose pliers with plastic or rubber handles,
- an extra Power Wheels® thermal fuse is helpful.

O

Bumper-to-Bumper* Limited Warranty

***One year limited warranty from the date of purchase on the Power Wheels® vehicle.
Six month limited warranty on the 6 volt battery.**

For the original purchaser, this one year limited warranty covers the Power Wheels® ride-on vehicle (purchased from Power Wheels®) against defects in materials and work-manship. The six month limited warranty applies only to the 6 volt battery included by Power Wheels® with the original purchase of the vehicle.

This warranty covers normal use and does not cover the Power Wheels® vehicle or battery if damaged by unreasonable use, neglect, accident, abuse, misuse, improper service or other causes not arising out of defects in materials or workmanship. Evidence of any attempt at consumer repair will void this warranty. THIS WARRANTY DOES NOT COVER, AND IS INTENDED TO EXCLUDE, ANY LIABILITY ON THE PART OF POWER WHEELS®, WHETHER UNDER THIS WARRANTY OR IMPLIED BY LAW FOR ANY INDIRECT OR CONSEQUENTIAL DAMAGES FOR BREACH OF WARRANTY. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION SO THIS LIMITATION MAY NOT APPLY TO YOU.

Should you need service or assistance with your vehicle during the warranty period, **do not return the vehicle to the store.** Power Wheels® has provided a nationwide network of authorized service centers. Please refer to the list in this manual. Power Wheels® is continually expanding our Authorized Service Center Network. If there is not an authorized service center in your area, please call Consumer Relations for information, **1-800-348-0751.**

THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS WHICH MAY VARY FROM STATE TO STATE.

PLEASE SAVE YOUR ORIGINAL SALES RECEIPT.

P

Authorized Service Centers

We are continually expanding our independently owned and operated Authorized Service Center Network. Please check this listing for the independently owned and operated Authorized Service Center nearest you. If there is not one in your area, please call Power Wheels® Consumer Relations at 1-800-348-0751.

IMPORTANT!

DO NOT use this vehicle for the first time until you have charged the battery for 18 hours.

Remember to...

- ✓ Charge the battery immediately after each use.
- ✓ Charge the battery once a month during storage, even if the vehicle has not been used.

Failure to follow these instructions will permanently damage your battery and void your warranty. Please refer to the Battery Care Section in this manual for more information.

For high speed operation, please refer to the "How to Operate Your Vehicle" section in this manual for more information.

DO NOT Return your Vehicle to the Store !

If you are missing parts or need assistance, please call us toll-free:
