**Elevation Track Pack - Flats**

# Assembly

# Elevation Track Tips

The more you collect, the more fun it gets!

Playsets and accessories sold separately and subject to availability. Two of each Elevation Track Packs used to make this configuration.

"Snap" a support top onto two support columns.

You can stack up support column assemblies to make a higher track layout.

To properly support elevated tracks, always make sure you have support columns under track connections.

- When you have a curved track at the bottom of a ramp assembly, be sure to use a guardrail on the curve. This keeps the fast moving train on the track!
- To attach the guardrail, fit a tab on one end of the guardrail under the curved track, as shown.
- Bend the guardrail slightly to fit the other two tabs to the curved track.
