### Starting the Game

1. Each player chooses a color. The remaining color is not played. Players use their pieces to build as normal, with 2 players, each playing red and yellow, and blue and green.

2. Subsequent Rounds

   - Each player chooses a color. The remaining color is not played. Players use their pieces to build as normal, with 2 players, each playing red and yellow, and blue and green.

### Variants

#### Solo

- **Blokus® 3D Solitaire**: Players use their own color to fill the game board. The winner is the player with the highest score.

#### 2 Players

- **2 Players with 2 Colors**: Players use both colors to build, with each player scoring for both of his/her colors. The winner is the player with the highest score.

#### 3 Players

- **3 Players**: Players use both colors to build, with each player scoring for both of his/her colors. The winner is the player with the highest score.

#### 4 Players

- **4 Players**: Players use both colors to build, with each player scoring for both of his/her colors. The winner is the player with the highest score.

### Strategy Tips

- **Plan your moves carefully**: Think ahead and try to block your opponents from placing pieces.
- **Use all your pieces**: Try to place all your pieces, as each piece you don’t use decreases the total score.
- **Watch your opponents**: Keep an eye on your opponents’ moves and try to anticipate their next moves.
- **Place your pieces strategically**: Try to place your pieces in areas that will maximize their placement options.
- **Avoid blocking yourself**: Try to place your pieces in areas that will not block your opponents from placing their pieces.
- **Use the corners**: Corners are valuable and should be used early in the game.

### Additional Notes for Playing Blokus®

- **Correct Placement**
  - Each player chooses one color. Players use their pieces to build as normal, with each player scoring for both of his/her colors. The winner is the player with the highest score.

- **Incorrect Placement**
  - Each player chooses one color. Players use their pieces to build as normal, with each player scoring for both of his/her colors. The winner is the player with the highest score.
