## HANG BRAGKETS

Remove black-printed liner from Command<sup>™</sup> Strip and place the bracket marked A onto the wall using the notch A outline on the template. Brackets are not interchangeable. Bracket should not overlap the template. Press bracket firmly onto wall and hold, pressing for 30 seconds. Red arrow should line up with

arrow on bracket. Repeat with remaining brackets.

## Remove Template

Once all brackets are firmly attached with red arrows correctly oriented, remove template. Note: For optimal adhesion performance 3M recommends waiting 1 hour before adding weight to Command<sup>™</sup> Strips.
