Assembly

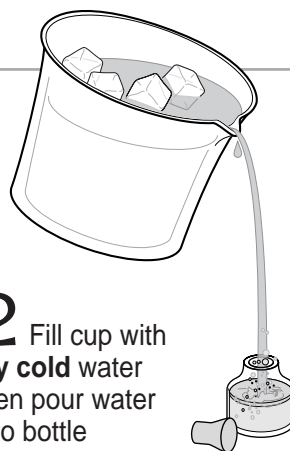

Play Time!

Water toys sometimes get messy. Protect play surfaces before use. Do not use on surfaces that can be damaged by water. Dry all items thoroughly before storing.

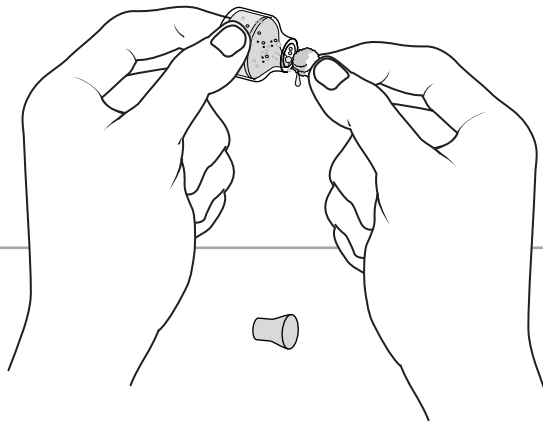

1 Load earring (TOP first). Push earring all the way in until it stops.

2 Fill cup with **icy cold** water then pour water into bottle

Cup not included.

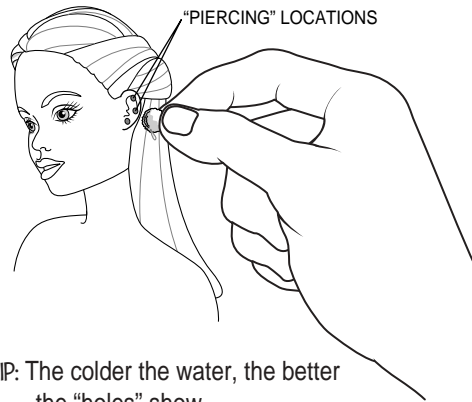

3 Dampen a cotton ball.

4 Wipe **icy cold** cotton ball across doll's ear.

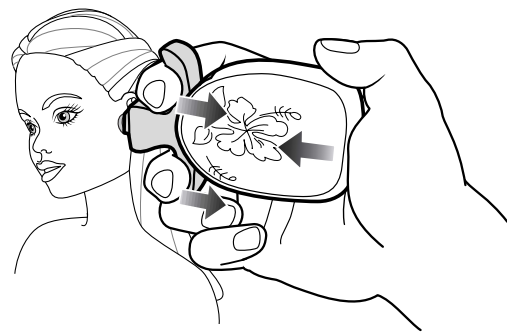

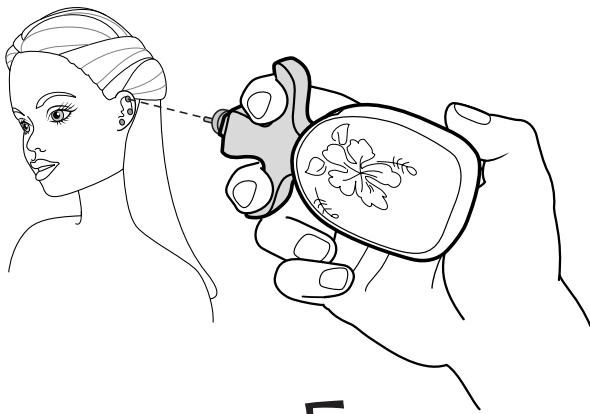

LOOK! 3 darker plugged "holes" appear where you may "pierce" doll's ears.

There are 3 "plugged holes" on each ear.
After each hole has been "pierced", it will not color change with icy cold water again.

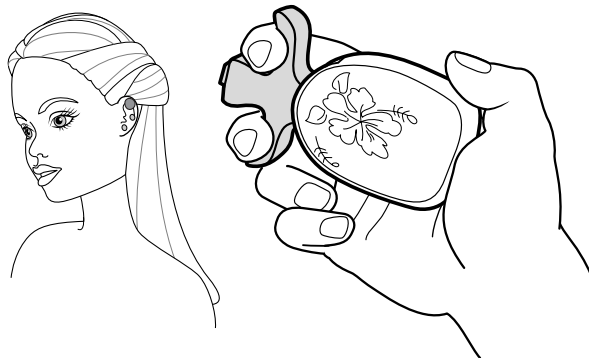

IMPORTANT! Color changes will last longer if you **DO NOT** expose doll to intense heat or direct sunlight for prolonged periods of time.

HELPFUL TIP: The colder the water, the better the "holes" show.

5 Place tip of earring on top of "hole" and push earring into doll's head. Squeeze applicator all the way and then release.

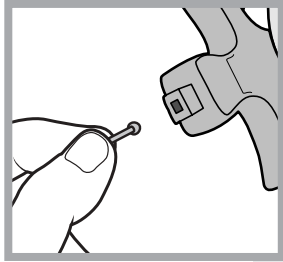

One, two, or three holes per ear!

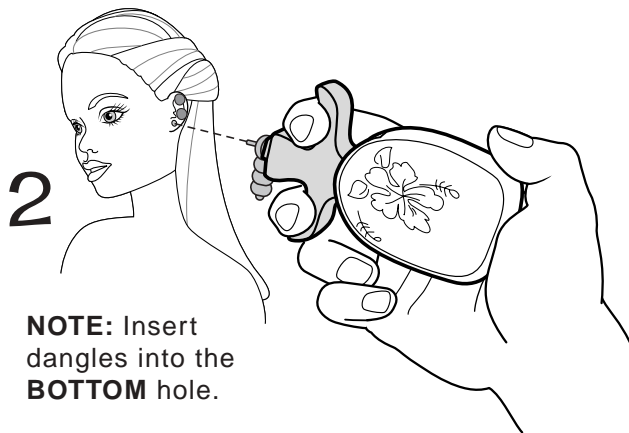

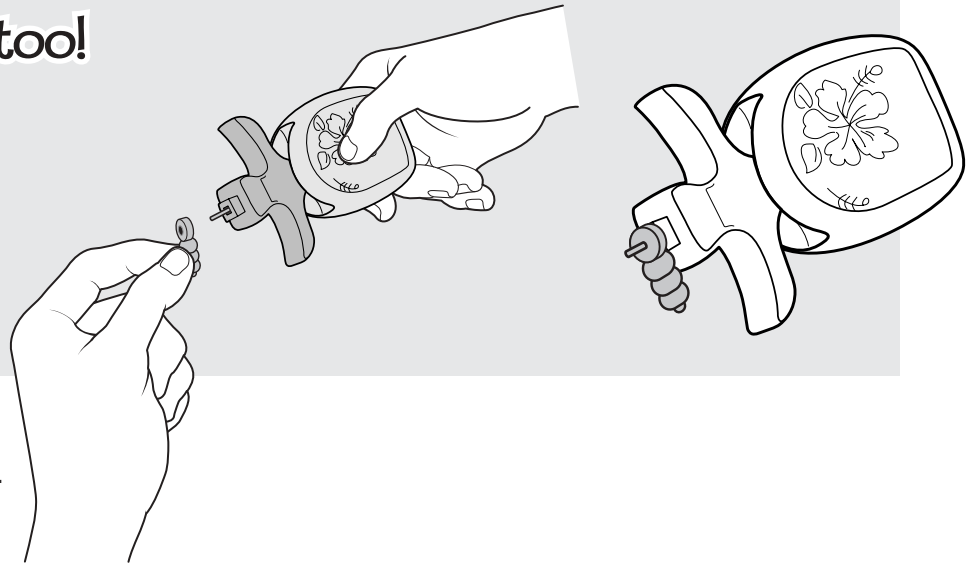

6 Pull applicator away.
Doll's earring is attached.

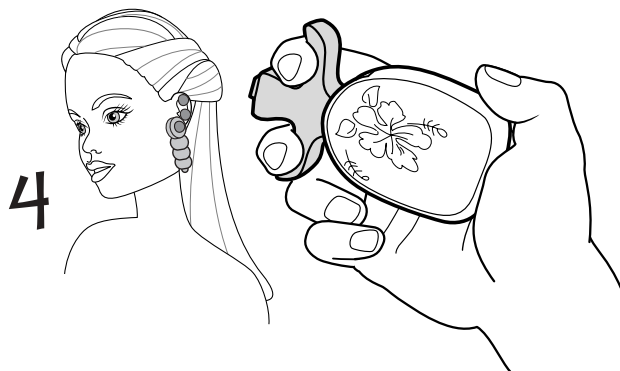

Add a dangle too!

1 Load earring (TOP first). Push earring all the way in until it stops.

NOTE: Insert dangles into the **BOTTOM** hole.

Pull out to remove earrings.
