

SAFETY RECALL!

Mattel, in cooperation with the United States Consumer Product Safety Commission is voluntarily recalling an accessory part of item number J9472 Barbie® Doll and Tanner™ containing a small powerful magnet. This magnet can fall out – undetected to parents and caregivers.

The magnet can be swallowed or aspirated by young children or placed by a child in their nose or ears. When more than one magnet is swallowed, the magnets can attract to each other and cause intestinal perforation, infection or blockage, which can be fatal. Aspiration to the lungs requires immediate surgery. Magnets placed in the nose or ears can cause swelling and be difficult to remove.

Please check your home, play areas and toys for any loose or liberated magnets – remove these from the reach of children and contact the local Mattel office to arrange return.

The affected part involved in this recall is the blue scooper with a magnet at the tip, which is used to pick up the plastic-coated metal pellets (the pellets are not magnets).

Please examine the end of the blue scooper. If a silver metal tip is revealed your product is affected and you should return your scooper to us for a replacement. If your scooper has a white plastic tip, you are not affected by this recall. If your scooper is purple, you are not affected by this recall.
