

FCN93 – Intel DreamTab Hard Factory Reset

1. Turn off your DreamTab.

2. Press the Volume + button first. Then press the Power button and hold them both until the system menu appears on the bottom left corner of the screen.

3. Use the Volume – button to highlight "Recovery Mode" or "Recovery". Then press the Power button to select it.

4. Hold down the Volume - button. As it is being held down, tap the Volume + button once. This will bring up the next menu.

5. Use the Volume - button to highlight "Wipe Data/Factory Reset". Then, press the Power button to select it.

6. Use the Volume – button to highlight “Yes – delete all user data”. Then, press the Power button to select it.

7. When the data wipe is complete, “Reboot the system now” should be highlighted. Press the Power button to reboot your DreamTab.

8. It will take about five minutes to reboot your DreamTab. Once the initialization is complete, you will see the Welcome screen. Follow the steps to set up your Wi-Fi connection and create a new account.
