To process your return, you’ll need to send us both hub assemblies from your product. There are several different models of the Rock ‘n Play Sleeper with different product assembly. Please select the instructions that most closely resembles your product. For some models, you’ll need a Phillips screwdriver/scissors/wire cutters to remove the hub assemblies.

**A.** This model does not have a soothing unit or an auto-rock unit. Some models require that you pull the tubes apart to remove the hub assemblies. Follow **steps 1-4 and 9** in the A section. Other models have buttons on the metal tubes. You’ll need to press the buttons while pulling to remove hub assemblies from the frame and bases. Follow **steps 5-9** in the A section.

**B.** This model includes a soothing unit on the upper frame. It does not have an auto-rock unit.

**C.** This model includes a soothing unit on the upper frame and an auto-rock unit on the base. The auto-rock controls are located on the soothing unit.

**D.** This model includes a combined soother-auto-rock unit on the base of the product.

**E.** This model includes a combined soother-auto-rock unit on the base of the product. This model also has wood bases.
